Emergency Department Director

Subject: Construction Safety - Cemetery Lane

Copies to: Terry Spring, Vice President of Support Services; Carla Vallem, Project Manager Facilities

memorandum

It has been brought to my attention that the construction crews are very concerned about their safety. Many ambulance crews are not proceeding through the construction zone slowly, and with caution.

In the previous memo, we had requested that the ambulance crews only enter via Harding Way or Maple Street due to the construction and heavy equipment, yet many ambulance crews are still entering from Mc Cloud Street.

Currently, there are open trenches that are very deep, and the construction crews are now working down in the trenches. Please remind all ambulance crews to proceed with caution, and enter via Harding Way or Maple Street only, during the hours of 0600-1700.

The projected time frame for this construction project is approximately two weeks. Thank you for your cooperation in this matter

If you have any questions, you may contact the Emergency Department at (209) 467-6400.

Thank you.
