

REACHSM on Tour

Bringing education closer to home

2009 Topics on Board

Pediatric Respiratory Emergencies

When your patient can't breathe, it's not good. When it's a kid, it can be frightening! Learn how to identify the pediatric patient in respiratory distress and what you can do about it.

If I Only Had a Brain: Acute Ischemic and Hemorrhagic Stroke

When neuro insult happens, the brain is highly offended. This presentation will cover everything from diagnosis to the most cutting-edge treatment modalities.

Ballistics/Penetrating Injuries

Wrong place, wrong time? Was a gun involved? We will talk about a multitude of penetrating objects, the injuries that they cause, and how to treat them.

Helicopter Safety

Being safe around a two-ton spinning, rotating machine is always a good idea. This presentation provides the information you need to be safe around helicopter.

Submersion Injuries

We'll look at what happens when humans try to "swim with the fishes." You will learn about the epidemiology, physiology and treatment for this highly preventable tragedy.

Cardiac--The Evolving MI

So if "time is muscle," how can you identify the patient having an acute MI and get them to rapid intervention? Learn how you can make a difference!

Special Needs Children

Every child is special, but some really do have special needs. Special needs can be overwhelming to anyone not familiar with "high tech" care. This presentation will help you be more prepared.

Please visit www.REACHair.com to view the latest REACH on Tour schedule.
