

LOWER SACRAMENTO ROAD UPDATE

PRESS RELEASE

JULY 29, 2016

Construction of Stage 1 is now complete. Traffic has been shifted onto the newly widened sections of Lower Sacramento Road, effective immediately. Motorists are recommended to reduce speeds as several lane shifts exist throughout the construction zone. Please exercise caution when traveling the roadway as the traffic configuration is expected to change throughout the construction process.

Stage 2 activities will include reconstruction of the existing roadway and construction of the newly raised median divider. The Project is scheduled to be complete by September 2017, weather permitting.

Minor traffic delays should be expected. Motorists should allow extra time or may want to consider an alternate route.

For more information, please visit the Project website at www.lowersacroad.com or contact the County's Construction Engineer.
