INITIAL STUDY/NEGATIVE DECLARATION

[Pursuant to Public Resources Code Section 21080(c) and California Code of Regulations, Title 14, Sections 15070-15071]

LEAD AGENCY: San Joaquin County Community Development Department

PROJECT APPLICANT: Sarup & Ranjit K. Srai

PROJECT TITLE/FILE NUMBER(S): PA-2400078 (VR), PA-2400079 (MS)

PROJECT DESCRIPTION: This project is comprised of two applications: <u>Variance No. 2400078 to reduce the minimum lot size in the AG-40 (General Agriculture, 40-acre minimum) zone from 40 acres to 5-acres; and a Minor Subdivision No. PA-2400079 to subdivide an existing 10-acre parcel into two 5-acre parcels. The site currently contains a single-family residence. While the applicant is not proposing to construct any additional dwellings or structures, the resulting subdivision would allow for an additional single-family residence and an accessory dwelling on each of the newly created lots.</u>

The project site is located on the southwest corner of S. Lammers Road and Phillip Martin Court, North of Tracy.

ASSESSOR PARCEL NO.: 212-090-15

ACRES: 10-acres

GENERAL PLAN: A/G (General Agriculture)

ZONING: AG-40 (General Agriculture, 40-acre minimum)

POTENTIAL POPULATION, NUMBER OF DWELLING UNITS, OR SQUARE FOOTAGE OF USE(S): A single-family residence, accessory dwelling unit, and accessory buildings on each lot.

SURROUNDING LAND USES:

NORTH: Agricultural with scattered residences; Old River
SOUTH: Agricultural with scattered residences; City of Tracy
Agricultural with scattered residences; Tom Paine Slough

WEST: Agricultural with scattered residences; Old River

REFERENCES AND SOURCES FOR DETERMINING ENVIRONMENTAL IMPACTS:

Original source materials and maps on file in the Community Development Department including: all County and City general plans and community plans; assessor parcel books; various local and FEMA flood zone maps; service district maps; maps of geologic instability; maps and reports on endangered species such as the Natural Diversity Data Base; noise contour maps; specific roadway plans; maps and/or records of archeological/historic resources; soil reports and maps; etc.

TRIBAL CULTURAL RESOURCES:

Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1? If so, is there a plan for consultation that includes, for example, the determination of significance of impacts to tribal cultural resources, procedures regarding confidentiality, etc.?

No

GENERAL CONSIDERATIONS:

1.	Does it appear that any environmental feature of the project will generate significant public concern or controversy? Yes No
	Nature of concern(s): Enter concern(s).
2.	Will the project require approval or permits by agencies other than the County? ☐ Yes ☐ No
	Agency name(s): Enter agency name(s).
3.	Is the project within the Sphere of Influence, or within two miles, of any city? Yes No
	City: Tracy

s a <u>D</u>	I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier <u>EIR</u> or <u>NEGATIVE DECLARATION</u> pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier <u>EIR</u> or <u>NEGATIVE DECLARATION</u> , including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.					
Signa	ature: Nancy/Arroyo Associate Planner	70			8/9/24 Date	

EVALUATION OF ENVIRONMENTAL IMPACTS:

- 1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from "Earlier Analyses," as described in (5) below, may be cross-referenced).
- 5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
 - a) Earlier Analysis Used. Identify and state where they are available for review.
 - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7) Supporting Information Sources: A source list should be attached, and other sources used, or individuals contacted should be cited in the discussion.
- 8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.
- 9) The explanation of each issue should identify:
 - a) the significance criteria or threshold, if any, used to evaluate each question; and
 - b) the mitigation measure identified, if any, to reduce the impact to less than significance.

Issues:

		Potentially Significant Impact	Significant with Mitigation Incorporated	oigimicant	No	Analyzed In The Prior EIR
<u>I. A</u>	ESTHETICS.	-			-	
	cept as provided in Public Resources Code Section 21099, uld the project:					
a)	Have a substantial adverse effect on a scenic vista?			\boxtimes		
b)	Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?			\boxtimes		
c)	In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from a publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?	1 1	7 <u> </u>	\boxtimes		
d)	Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?			\boxtimes		

I aga Than

Impact Discussion:

This project is comprised of two applications: Variance No. PA-2400078 to reduce the minimum lot size in the AG-40 (General Agriculture, 40-acre minimum) zone from 40 acres to 5-acres; and a Minor Subdivision No. PA-2400079 to subdivide an existing 10-acre parcel into two 5-acre parcels. The site currently contains a single-family residence. While the applicant is not proposing to construct any additional dwellings or structures, the resulting subdivision would allow for an additional single-family residence and an accessory dwelling on each of the newly created lots.

- a-c) The project site is located on the southwest corner of S. Lammers Road and Phillip Martin Court, which is a county-maintained road. The project is not located along a designated scenic route pursuant to 2035 General Plan Figure 12-2. The surrounding area is a mixture of agricultural and residential uses. The potential of an additional single-family residence would not have a significant or adverse effect on visual character, public views, or scenic vistas and would be visually consistent with surrounding development.
- d) Any future development would be required to follow the San Joaquin Development Title requirements contained in Chapter 9-403 Lighting and Illumination, and as a result, the proposed project is not anticipated to create any new source of substantial light or glare affecting day or nighttime views in the area. As a result, the proposed project is anticipated to have a less than significant impact on aesthetics.

		Significant	Mitigation	Less Than Significant	No	Analyzed In The
In cosing the Assemble of the	determining whether impacts to agricultural resources are nificant environmental effects, lead agencies may refer to California Agricultural Land Evaluation and Site sessment Model (1997) prepared by the California Dept. of nservation as an optional model to use in assessing pacts on agriculture and farmland. In determining whether pacts to forest resources, including timberland, are nificant environmental effects, lead agencies may refer to promation compiled by the California Department of Forestry of Fire Protection regarding the state's inventory of forest d, including the Forest and Range Assessment Project and Forest Legacy Assessment project; and forest carbon asurement methodology provided in Forest Protocols opted by the California Air Resources Board Would the niject:	Impact	Incorporated	Impact	Шрас	Prior EIR
a)	Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to nonagricultural use?			\boxtimes		
b)	Conflict with existing zoning for agricultural use, or a Williamson Act contract?			\boxtimes		
c)	Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?			\boxtimes		
d)	Result in the loss of forest land or conversion of forest land to non-forest use?			\boxtimes		
e)	Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?			\boxtimes		

This project is comprised of two applications: Variance No. PA-2400078 to reduce the minimum lot size in the AG-40 (General Agriculture, 40-acre minimum) zone from 40 acres to 5-acres; and a Minor Subdivision No. PA-2400079 to subdivide an existing 10-acre parcel into two 5-acre parcels. The site currently contains **a** single-family residence. While the applicant is not proposing to construct any additional dwellings or structures, the resulting subdivision would allow for an additional single-family residence and an accessory dwelling on each of the newly created lots.

a) The parcel is designated as Prime Farmland on the Farmland Mapping and Monitoring Program of the California Resources Agency. Subdivision of the property would not convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance to a non-agricultural use. However, the project site is within an existing developed area, surrounded by small homesites, thus limiting the viability of farming potential onsite. Potential future development of a single-family residence and accessory dwelling units is permitted in the AG-40 zone. Additionally, there is an

- existing 15-foot-wide irrigation easement running vertically along proposed Parcel "2" property line. As a result, potential impacts related to conversion of Farmland to a non-agricultural use would be less than significant.
- b) The subject property is currently zoned AG-40 and the applicant is not requesting to rezone this parcel. Agricultural uses can continue to exist on both lots if the Variance is approved and the applicant applies for a Minor Subdivision. Additionally, the property is not under the California Land Conservation Act (Williamson Act) contract.
- c-e) The site is not zoned for uses related to timberland or timberland production. The project site is also not existing forest land, and therefore, does not propose the conversion or loss of forest land to a non-forest use. There are no proposals to make changes to the existing environment resulting in the conversion of farmland to a non-agriculture use. As a result, the proposed project is anticipated to have a less than significant impact related to the loss or conversion of forest land, timberland, and Farmland.

	AID OHALITY	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	Analyzed In The Prior EIR
Wh app dis	AIR QUALITY. here available, the significance criteria established by the olicable air quality management or air pollution control trict may be relied upon to make the following therminations. Would the project:				
a)	Conflict with or obstruct implementation of the applicable air quality plan?			\boxtimes	
b)	Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?			\boxtimes	
c)	Expose sensitive receptors to substantial pollutant concentrations?			\boxtimes	
d)	Result in substantial emissions (such as those leading to odors) adversely affecting a substantial number of people?			\boxtimes	

This project is comprised of two applications: Variance No. PA-2400078 to reduce the minimum lot size in the AG-40 (General Agriculture, 40-acre minimum) zone from 40 acres to 5-acres; and a Minor Subdivision No. PA-2400079 to subdivide an existing 10-acre parcel into two 5-acre parcels. The site currently contains a single-family residence. While the applicant is not proposing to construct any additional dwellings or structures, the resulting subdivision would allow for an additional single-family residence and an accessory dwelling on each of the newly created lots.

a-d) The project site is in the San Joaquin County Valley Air Basin, which is regulated by the San Joaquin Valley Unified Air Pollution Control District (SJVAPCD). The SJVAPCD is the lead air quality regulatory agency for the San Joaquin County. The applicant will be required to meet existing requirements for emissions and dust control as established by SJVAPCD. The project was referred to the SJVAPCD for review. In the event that any new construction occurs, the project would be subject to SJVAPCD's rules and regulations.

The project was reviewed under the SJVAPCD's Small Project Analysis Levels (SPAL). Single Family Residence on the use table for SPAL is classified as Single Family, and a Single Family that proposes less than 155 dwelling units for the use and generates less than 1,000 average daily one-way- trips are presumed to have less than significant impact on air quality. As a result, air quality impacts are anticipated to be less than significant.

Less Than

Impact Discussion:

This project is comprised of two applications: Variance No. PA-2400078 to reduce the minimum lot size in the AG-40 (General Agriculture, 40-acre minimum) zone from 40 acres to 5-acres; and a Minor Subdivision No. PA-2400079 to subdivide an existing 10-acre parcel into two 5-acre parcels. The site currently contains a single-family residence. While the applicant is not proposing to construct any additional dwellings or structures, the resulting subdivision would allow for an additional single-family residence and an accessory dwelling on each of the newly created lots.

a-f) A referral was sent to the San Joaquin Council of Governments (SJCOG) on April 3, 2024, for review. The San Joaquin Council of Governments (SJCOG) has determined that the project is subject to the San Joaquin County Multi-Species Habitat Conservation and Open Space Plan (SJMSCP) for any future development that results in ground disturbance. Participation in the SJMSCP provides compensation for the conversion of Open Space to non-Open Space uses which affect the plant, fish and wildlife species covered by the Plan. If the Variance and subsequent Minor Subdivision are approved, any future ground disturbance at the site would be subject to the SJMSCP as a Condition of Approval of the Minor Subdivision. Pursuant to the Final EIR/EIS for San Joaquin County Multi-Species Habitat Conservation and Open Space Plan (SJMSCP), dated November 15, 2000, and certified by SJCOG on December 7, 2000, participation in the SJMSCP is expected to reduce impacts to biological resources resulting from the proposed project to less-than-significant level.

V. (CULTURAL RESOURCES.		moorporated			
	ould the project:					
а)	Cause a substantial adverse change in the significance of a historical resource pursuant to \$15064.5?			\boxtimes		
၁)	Cause a substantial adverse change in the significance of an archaeological resource pursuant to § 15064.5?			\boxtimes		
c)	Disturb any human remains, including those interred outside of dedicated cemeteries?			\boxtimes		

This project is comprised of two applications: Variance No. PA-2400078 to reduce the minimum lot size in the AG-40 (General Agriculture, 40-acre minimum) zone from 40 acres to 5-acres; and a Minor Subdivision No. PA-2400079 to subdivide an existing 10-acre parcel into two 5-acre parcels. The site currently contains a single-family residence. While the applicant is not proposing to construct any additional dwellings or structures, the resulting subdivision would allow for an additional single-family residence and an accessory dwelling on each of the newly created lots.

a–c) The site does not contain any known historical or archaeological resources, or other human remains. In the event human remains are encountered during any portion of the project, California state law requires that there shall be no further excavation or disturbance of the site, or any nearby area reasonably suspected to overlie adjacent remains until the coroner of the county has determined the manner and cause of death. Recommendations concerning the treatment and disposition of the human remains shall have been made to the person responsible for the excavation (California Health and Safety Code - Section 7050.5). At the time development, if Human burials are found to be of Native American origin, the developer shall follow the procedures pursuant to Title 14, Division 6, Chapter 3, Article 5, Section 15064.5(e) of the California State Code of Regulations. Therefore, impacts to cultural resources is anticipated to be less than significant.

b)	Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?			\boxtimes		

Loce Than

Impact Discussion:

This project is comprised of two applications: Variance No. PA-2400078 to reduce the minimum lot size in the AG-40 (General Agriculture, 40-acre minimum) zone from 40 acres to 5-acres; and a Minor Subdivision No. PA-2400079 to subdivide an existing 10-acre parcel into two 5-acre parcels. The site currently contains a single-family residence. While the applicant is not proposing to construct any additional dwellings or structures, the resulting subdivision would allow for an additional single-family residence and an accessory dwelling on each of the newly created lots.

(a-b) The California Energy Code (also titled The Energy Efficiency Standards for Residential and Non-residential Buildings) was created by the California Building Standards Commission in response to a legislative mandate to reduce California's energy consumption. The code's purpose is to advance the state's energy policy, develop renewable energy sources and prepare for energy emergencies. These standards are updated periodically by the California Energy Commission. The code includes energy conservation standards applicable to most buildings throughout California.

Any future development for residential dwellings of the project site will be subject to the California Energy Code (also titled The Energy Efficiency Standards for Residential and Non-residential Buildings). These requirements will also be applicable to any future proposed project ensuring that any impact to the environment due to wasteful, inefficient, or unnecessary consumption of energy will be less than significant and also preventing any conflict with state or local plans for energy efficiency and renewable energy.

Impact Discussion:

This project is comprised of two applications: Variance No. PA-2400078 to reduce the minimum lot size in the AG-40 (General Agriculture, 40-acre minimum) zone from 40 acres to 5-acres; and a Minor Subdivision No. PA-2400079 to subdivide an existing 10-acre parcel into two 5-acre parcels. The site currently contains a single-family residence. While the applicant is not proposing to construct any additional dwellings or structures, the resulting subdivision would allow for an additional single-family residence and an accessory dwelling on each of the newly created lots.

a) The Soil Survey of San Joaquin County classifies the soil on the parcel as Grangeville fine sandy loam, partially drained, 0 to 2 percent slopes. The Grangeville series consists of somewhat poorly drained soils on flood plains. Grangeville fine sandy loam is permeability is moderately rapid. The Merritt silty clay loam, partially drained, 0 to 2 percent slopes. The Merritt silty clay loam is permeability is moderately slow. These units are suited to irrigated row and field crops. Most areas are used for irrigated crops which may provide wetland functions and values. If these units are used for homesite development, the main limitation is the high water table. The high water table increases the possibility that septic tank absorption fields will not function properly. The map unit is in capability units IIw-2, irrigated and IVw-2, nonirrigated.

According to the California Department of Conservation's California Geological Survey, the project site is not located within an earthquake fault zone. However, like other areas located in seismically active Northern California, the

project area is susceptible to strong ground shaking during an earthquake, and the site would not be affected by ground shaking more than any other area in the region. The project site is relatively flat and is not anticipated to directly or indirectly cause potential substantial adverse effects related to seismic-related ground failure or landslides. Therefore, any related impacts are anticipated to be less than significant.

- b-c) As part of the project design process, a soils report will be required for grading and foundations and all recommendations from a soils report must be incorporated into the construction plans. As a result of these grading recommendations, which are required by the California Building Code (CBC), the project would not be susceptible to the effects of any loss of topsoil, soil erosion, potential lateral spreading, subsidence, or liquefaction. Compliance with the CBC and the engineering recommendations in the site-specific soils report would ensure structural integrity in the event that seismic-related issues are experienced at the project site. Therefore, impacts associated with unstable geologic units are expected to be less than significant.
- d) The proposed project is located on property with moderate probability of expansive soil; however, the Building Department will review the required soil study and will not issue a Building Permit if it is found the development of the site could lead to the risk of a loss of life because of the expansiveness of the soil. As a result, it can be anticipated that any risk to life from potential future development would be considered less than significant.
- e) The project site is currently served by one onsite wastewater septic system. Any changes or additions to the system will be under permit and approval by the San Joaquin County Environmental Health Department and will have to meet the county's standards. As such, the project is expected to have a less than significant impact related to adequately supporting a wastewater system.
- f) The project area has not been determined to contain significant historic or prehistoric archeological artifacts that could be disturbed by potential future site development. The project site also does not contain any known unique geologic features. Therefore, damage to unique paleontological resources, sites or geologic features is expected to be less than significant.

Impact Discussion:

This project is comprised of two applications: Variance No. PA-2400078 to reduce the minimum lot size in the AG-40 (General Agriculture, 40-acre minimum) zone from 40 acres to 5-acres; and a Minor Subdivision No. PA-2400079 to subdivide an existing 10-acre parcel into two 5-acre parcels. The site currently contains a single-family residence. While the applicant is not proposing to construct any additional dwellings or structures, the resulting subdivision would allow for an additional single-family residence and an accessory dwelling on each of the newly created lots.

a-b) Emissions of GHGs contributing to global climate change are attributable in large part to human activities associated with the industrial/manufacturing, utility, transportation, residential, and agricultural sectors. Therefore, the cumulative global emissions of GHGs contributing to global climate change can be attributed to every nation, region, and city, and virtually every individual on earth. An individual project's GHG emissions are at a micro-scale level relative to global emissions and effects to global climate change; however, an individual project could result in a cumulatively considerable incremental contribution to a significant cumulative macro-scale impact. As such, impacts related to emissions of GHG are inherently considered cumulative impacts.

Implementation of the project would cumulatively contribute to increases of GHG emissions. Estimated GHG emissions attributable to future development would be primarily associated with increases of carbon dioxide (CO_2) and, to a lesser extent, other GHG pollutants, such as methane (CH_4) and nitrous oxide (N_2O) associated with area sources, mobile sources or vehicles, utilities (electricity and natural gas), water usage, wastewater generation, and the generation of solid waste. The primary source of GHG emissions for the project would be mobile source emissions. The common unit of measurement for GHG is expressed in terms of annual metric tons of CO_2 equivalents ($MTCO_2e/yr$).

As noted previously, the project will be subject to the rules and regulations of the SJVAPCD. The SJVAPCD has adopted the Guidance for Valley Land- use Agencies in Addressing GHG Emission Impacts for New Projects under CEQA and the District Policy - Addressing GHG Emission Impacts for Stationary Source Projects Under CEQA When Serving as the Lead Agency.1 The guidance and policy rely on the use of performance-based standards, otherwise known as Best Performance Standards (BPS) to assess significance of project specific greenhouse gas emissions on global climate change during the environmental review process, as required by CEQA. To be determined to have a less-than-significant individual and cumulative impact with regard to GHG emissions, projects must include BPS sufficient to reduce GHG emissions by 29 percent when compared to Business As Usual (BAU) GHG emissions. Per the SJVAPCD, BAU is defined as projected emissions for the 2002-2004 baseline period. Projects which do not achieve a 29 percent reduction from BAU levels with BPS alone are required to quantify additional project-specific reductions demonstrating a combined reduction of 29 percent. Potential mitigation measures may include, but not limited to: on-site renewable energy (e.g. solar photovoltaic systems), electric vehicle charging stations, the use of alternative-fueled vehicles, exceeding Title 24 energy efficiency standards, the installation of energy-efficient lighting and control systems, the installation of energy-efficient mechanical systems, the installation of drought-tolerant landscaping, efficient irrigation systems, and the use of low-flow plumbing fixtures.

It should be noted that neither the SJVAPCD nor the County provide project-level thresholds for construction-related GHG emissions. Construction GHG emissions are a one-time release and are, therefore, not typically expected to generate a significant contribution to global climate change.

c)	Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?			\boxtimes		
d)	Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?			\boxtimes		
e)	For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?				\boxtimes	
f)	Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?			\boxtimes		
g)	Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?			\boxtimes		

L - - - Th - -

Impact Discussion:

This project is comprised of two applications: Variance No. PA-2400078 to reduce the minimum lot size in the AG-40 (General Agriculture, 40-acre minimum) zone from 40 acres to 5-acres; and a Minor Subdivision No. PA-2400079 to subdivide an existing 10-acre parcel into two 5-acre parcels. The site currently contains a single-family residence. While the applicant is not proposing to construct any additional dwellings or structures, the resulting subdivision would allow for an additional single-family residence and an accessory dwelling on each of the newly created lots.

a-d) Any future development of the parcels will be residential or agricultural and the project site is not anticipated to be the site of an industrial or commercial use that might include the use and/or storage of hazardous materials/waste. The site is also not included on the list of hazardous materials sites compiled pursuant to Government Code Section 65962.5. Additionally, the proposed application will not result in, create, or induce hazards and associated risks to the public. As the proposed application does not include the construction of any dwellings or structures, impacts are anticipated to be less than significant related to the transport, use, or storage of hazardous materials during construction activities. However, potential future construction activities for the project site may involve the use of toxic or hazardous materials such as paint, fuels, and solvents. These would be subject to federal, state, and local laws and requirements designed to minimize and avoid potential health and safety risks associated with hazardous materials. The project's propensity for releasing toxins into the environment is also expected to be less than significant.

- e) The project site is not located within the vicinity of a private airstrip, an airport land use plan, or, where such a plan has not been adopted, within 2 miles of a public airport or public use airport. Therefore, the project would not result in a safety hazard or excessive noise for people residing or working in the project area related to airports.
- f) The project does not include any proposed construction, but any future development of the site would be reviewed for emergency access. As a result, impacts related to the impairing implementation of or physically interfering with an adopted emergency response plan or emergency evacuation plan are anticipated to be less than significant.
- g) The project site is not located within a Fire Hazard Severity Zone or a Very High Fire Hazard Severity Zone according to the Local Responsibility and State Responsibility Area maps by the California Department of Forestry and Fire Protection (CAL FIRE 2020). Therefore, the project is not expected to expose people or structure, directly or indirectly, to wildland fires and would have a less than significant impact related to wildlands.

(Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
		DROLOGY AND WATER QUALITY. the project:					
	Vic rec	plate any water quality standards or waste discharge quirements or otherwise substantially degrade surface or bund water quality?			\boxtimes		
b)	suk pro	bstantially decrease groundwater supplies or interfere ostantially with groundwater recharge such that the bject may impede sustainable groundwater inagement of the basin?			\boxtimes		
c)	or a	bstantially alter the existing drainage pattern of the site area, including through the alteration of the course of a eam or river or through the addition of impervious faces, in a manner which would:			\boxtimes		
	i)	result in substantial erosion or siltation on- or off-site;			\boxtimes		
	ii)	substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site;			\boxtimes		
	iii)	create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or			\boxtimes		
	iv)	impede or redirect flood flows?			\boxtimes		
d)		flood hazard, tsunami, or seiche zones, risk release of llutants due to project inundation?			\boxtimes		
e)		inflict with or obstruct implementation of a water quality ntrol plan or sustainable groundwater management in?			\boxtimes		

This project is comprised of two applications: Variance No. PA-2400078 to reduce the minimum lot size in the AG-40 (General Agriculture, 40-acre minimum) zone from 40 acres to 5-acres; and a Minor Subdivision No. PA-2400079 to subdivide an existing 10-acre parcel into two 5-acre parcels. The site currently contains a single-family residence. While the applicant is not proposing to construct any additional dwellings or structures, the resulting subdivision would allow for an additional single-family residence and an accessory dwelling on each of the newly created lots.

- a-b, e) As there is no proposed construction, the proposed Variance application to facilitate a Minor Subdivision will not degrade surface or ground water quality, substantially decrease groundwater supplies, or interfere substantially with groundwater recharge. However, any future development of the site would be subject to the rules and requirements of the Environmental Health Department related to water quality, and subject to the rules and requirements of the Department of Public Works related to storm drainage and groundwater. As a result, impacts to water quality, groundwater, and storm drainage and any related implementation or management plans are expected to be less than significant.
- c) The site is approximately 0.5 miles east of Old River and approximately 1.9 miles east of Tom Paine Slough. The proposed project does not include the construction of any new dwellings or structures, and the potential future Minor Subdivision will not violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality. A Building Permit will be required for any future development of the project

- site, and any necessary drainage improvements will be subject to the San Joaquin County Development Standards, which are reviewed by the Department of Public Works. Therefore, the project and any future potential development is expected to have a less than significant impact on the drainage pattern of the site.
- d) The project site is located within a Federal Emergency Management Agency Designated Flood Hazard Area Zone AE. The project site is not located within a tsunami or seiche zone. A referral was sent to the Department of Public Works, Flood Control Division on April 3, 2024, for comments. No recommendations were provided; however, the any future development of the site will have to comply with Development Title Section 9-703 regarding flood hazard requirements. As a result, impacts related to flooding are anticipated to be less than significant.

	LAND USE AND PLANNING.	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
Wo	uld the project:					
a)	Physically divide an established community?			\boxtimes		
b)	Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?				\boxtimes	

This project is comprised of two applications: Variance No. PA-2400078 to reduce the minimum lot size in the AG-40 (General Agriculture, 40-acre minimum) zone from 40 acres to 5-acres; and a Minor Subdivision No. PA-2400079 to subdivide an existing 10-acre parcel into two 5-acre parcels. The site currently contains a single-family residence. While the applicant is not proposing to construct any additional dwellings or structures, the resulting subdivision would allow for an additional single-family residence and an accessory dwelling on each of the newly created lots.

a-b) The project site is located within a rural area outside of a General Plan-defined community. Therefore, the project will not physically divide an established community. The existing AG-40 zoning and General Plan designation of A/G (General Agriculture) for the project site will remain the same for the project site, even if the project is approved. If the Variance and Minor Subdivision application are approved, three additional dwellings could be built under the current AG-40 zoning. The potential for a new single-family residence and accessory structures is anticipated to have less than significant impact on surrounding parcels and will not create premature development pressure on surrounding agricultural lands to convert land from agricultural uses to non-agricultural uses. Additionally, the proposed project will not be a conflict with any existing or planned uses or set a significant land use precedent, nor will it be in conflict with any Master Plans, Specific Plans, or Special Purpose Plans, or any other applicable plan adopted by the County. Therefore, impacts related to land use conflicts are anticipated to be less than significant.

		Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
XII.	MINERAL RESOURCES.	·	to be the control of	·		
Wo	uld the project:					
a)	Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?			\boxtimes		
b)	Result in the loss of availability of a locally- important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?			\boxtimes		

Loop Thon

Impact Discussion:

This project is comprised of two applications: Variance No. PA-2400078 to reduce the minimum lot size in the AG-40 (General Agriculture, 40-acre minimum) zone from 40 acres to 5-acres; and a Minor Subdivision No. PA-2400079 to subdivide an existing 10-acre parcel into two 5-acre parcels. The site currently contains a single-family residence. While the applicant is not proposing to construct any additional dwellings or structures, the resulting subdivision would allow for an additional single-family residence and an accessory dwelling on each of the newly created lots.

a-b) The project site is not in an area designated MRZ-1 which may contain minerals of significance or known mineral resources. San Joaquin County applies a mineral resource zone (MRZ) designation to land that meets the significant mineral deposits definition by the State Division of Mines and Geology. However, there is currently no mining activity on the parcel or in the area, and the surrounding area is developed with agricultural uses and scattered residences. No construction or physical changes are proposed to this property as a result of the Variance application. Therefore, the proposed project is anticipated to have a less than significant impact on the availability of mineral resources or mineral resource recovery sites within San Joaquin County.

		Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	In The Prior EIF
	I. NOISE. ould the project result in:					
	Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?			\boxtimes		
b)	Generation of excessive ground borne vibration or ground borne noise levels?			\boxtimes		
c)	For a project within the vicinity of a private airstrip or an airport land use plan, or where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?				\boxtimes	

Loce Than

Impact Discussion:

This project is comprised of two applications: Variance No. PA-2400078 to reduce the minimum lot size in the AG-40 (General Agriculture, 40-acre minimum) zone from 40 acres to 5-acres; and a Minor Subdivision No. PA-2400079 to subdivide an existing 10-acre parcel into two 5-acre parcels. The site currently contains a single-family residence. While the applicant is not proposing to construct any additional dwellings or structures, the resulting subdivision would allow for an additional single-family residence and an accessory dwelling on each of the newly created lots.

- a-b) While the Variance and Minor Subdivision application does not propose construction or physical changes to the property, any subsequent development project may have equipment utilized in the grading of the site that will temporarily increase the areas ambient noise levels. Any future development will be required to comply with the County's Noise Ordinance, including Development Title 9-404.060, which states that noise sources associated with construction are exempt from the provisions of the Noise Ordinance, provided such activities do not take place before 6:00 am or after 9:00 om on weekdays. Therefore, noise generation associated with any future projects is anticipated to be less than significant.
 - c) The project is not located within two miles of a public airport, airport land use plan or private air strip. As a result, there are no anticipated impacts related to excessive noise levels related to people residing or working in the project area.

\		Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
XΙ\	/. POPULATION AND HOUSING.		•			
Wc	ould the project:					
a)	Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?			\boxtimes		
b)	Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?			\boxtimes		

Loop Thon

Impact Discussion:

This project is comprised of two applications: Variance No. PA-2400078 to reduce the minimum lot size in the AG-40 (General Agriculture, 40-acre minimum) zone from 40 acres to 5-acres; and a Minor Subdivision No. PA-2400079 to subdivide an existing 10-acre parcel into two 5-acre parcels. The site currently contains a single-family residence. While the applicant is not proposing to construct any additional dwellings or structures, the resulting subdivision would allow for an additional single-family residence and an accessory dwelling on each of the newly created lots.

a-b) If the Variance and Minor Subdivision application are approved, the creation of 2 parcels could result in a maximum of 2 single-family residences and 2 accessory dwelling units. This would not provide for substantial population growth. The project also would not displace substantial numbers of existing people or housing or necessitate the construction of replacement housing. Therefore, the project is expected to have a less than significant impact on population and housing.

	Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
XV. PUBLIC SERVICES. a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:			\boxtimes		
Fire protection?			\boxtimes		
Police protection?			\boxtimes		
Schools?			\boxtimes		
Parks?			\boxtimes		
Other public facilities?			\boxtimes		

This project is comprised of two applications: Variance No. PA-2400078 to reduce the minimum lot size in the AG-40 (General Agriculture, 40-acre minimum) zone from 40 acres to 5-acres; and a Minor Subdivision No. PA-2400079 to subdivide an existing 10-acre parcel into two 5-acre parcels. The site currently contains a single-family residence. While the applicant is not proposing to construct any additional dwellings or structures, the resulting subdivision would allow for an additional single-family residence and an accessory dwelling on each of the newly created lots.

a) The site is currently served, and project description was referred to the Tracy Rural Fire District for Fire Protection, the Sheriff's Office for police protection, and Tracy Unified School District for school services. There are no parks near the project site, and the proposed Variance and Minor Subdivision would not require additional parkland. If the Variance and Minor Subdivision application are approved, the creation of 2 parcels could result in a maximum of 2 single-family residences and 2 accessory dwelling units. which would not have a substantial impact on these public services. Therefore, the project is expected to have a less than significant impact on existing public services and would not create a need for new public services.

	Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
XVI. RECREATION.					
a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?				\boxtimes	
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?				\boxtimes	

Lace Than

Impact Discussion:

This project is comprised of two applications: Variance No. PA-2400078 to reduce the minimum lot size in the AG-40 (General Agriculture, 40-acre minimum) zone from 40 acres to 5-acres; and a Minor Subdivision No. PA-2400079 to subdivide an existing 10-acre parcel into two 5-acre parcels. The site currently contains a single-family residence. While the applicant is not proposing to construct any additional dwellings or structures, the resulting subdivision would allow for an additional single-family residence and an accessory dwelling on each of the newly created lots.

a-b) If the Variance and Minor Subdivision application are approved, the creation of 2 parcels could result in a maximum of 2 single-family residences and 2 accessory dwelling units. Therefore, the project is expected to have a less than significant impact on the use of recreational facilities and does not include or require the construction or expansion of recreation facilities.

		Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
	II. TRANSPORTATION.					
a)	ould the project: Conflict with a program plan, ordinance, or policy					
u,	addressing the circulation system, including transit, roadways, bicycle, and pedestrian facilities?			\boxtimes		
b)	Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?			\boxtimes		
c)	Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?			\boxtimes		
d)	Result in inadequate emergency access?			\boxtimes		

This project is comprised of two applications: Variance No. PA-2400078 to reduce the minimum lot size in the AG-40 (General Agriculture, 40-acre minimum) zone from 40 acres to 5-acres; and a Minor Subdivision No. PA-2400079 to subdivide an existing 10-acre parcel into two 5-acre parcels. The site currently contains a single-family residence. While the applicant is not proposing to construct any additional dwellings or structures, the resulting subdivision would allow for an additional single-family residence and an accessory dwelling on each of the newly created lots.

- a) The proposed Variance and Minor Subdivision do not propose to change the General Plan designation or zoning, and any use resulting from the proposed project would not conflict with a program plan, ordinance, or policy addressing the circulation system, including transit, roadways, bicycle, and pedestrian facilities.
- b) While San Joaquin County has not yet adopted guidelines for implementing the requirements of SB 743 to address VMT, it is possible to make a determination of the project's impacts based on Office of Planning and Research (OPR) direction and the preliminary background information developed by the County based on these findings. The project is a small project that is consistent with the San Joaquin Council of Governments Sustainable Communities Strategy and the 2035 General Plan. Based on this information, the project can be deemed to have a less than significant impact on transportation.
- c) Although the proposed project does not propose any new development, if future development is proposed, the applicant would be required to meet design standards for driveways, egress, and ingress as required by the Development Title, the San Joaquin County Development Standards, and the Public Works Department. Therefore, potential impacts from hazards related to geometric design features or incompatible uses are considered to be less than significant.
- d) The Tracy Rural Fire District is responsible for providing fire protection services and will review any proposed future development projects to ensure the property is able to adhere to development requirements related to fire access. As a result, the project and any future development is anticipated to have adequate emergency access and create a less than significant impact.

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
<u>(V</u>)	VIII. TRIBAL CULTURAL RESOURCES. Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:					
	 Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or 			\boxtimes		
	ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of— Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.			\boxtimes		

This project is comprised of two applications: Variance No. PA-2400078 to reduce the minimum lot size in the AG-40 (General Agriculture, 40-acre minimum) zone from 40 acres to 5-acres; and a Minor Subdivision No. PA-2400079 to subdivide an existing 10-acre parcel into two 5-acre parcels. The site currently contains a single-family residence. While the applicant is not proposing to construct any additional dwellings or structures, the resulting subdivision would allow for an additional single-family residence and an accessory dwelling on each of the newly created lots.

a) A referral was sent to the North Valley Yokuts Tribe, United Auburn Indian Community, Buena Vista Rancheria, and California Valley Miwok tribe for review on April 3, 2024. If human burials found to be of Native American origin are encountered at the time of development all work shall halt in the vicinity and the County Coroner shall be notified immediately. At the same time, a qualified archaeologist shall be contacted to evaluate the find. The developer shall follow the procedures pursuant to Title 14, Division 6, Chapter 3, Article 5, Section 15064.5(e) of the California State Code of Regulations. Therefore, the proposed project is anticipated to have a less than significant impact on Tribal Cultural Resources.

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
	UTILITIES AND SERVICE SYSTEMS.					
a)	uld the project: Require or result in the relocation or construction of new or expanded water, wastewater treatment, or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?			\boxtimes		
b)	Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?			\boxtimes		
c)	Result in a determination by the wastewater treatment provider, which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?			\boxtimes		
d)	Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?			\boxtimes		
e)	Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?			\boxtimes		

This project is comprised of two applications: Variance No. PA-2400078 to reduce the minimum lot size in the AG-40 (General Agriculture, 40-acre minimum) zone from 40 acres to 5-acres; and a Minor Subdivision No. PA-2400079 to subdivide an existing 10-acre parcel into two 5-acre parcels. The site currently contains a single-family residence. While the applicant is not proposing to construct any additional dwellings or structures, the resulting subdivision would allow for an additional single-family residence and an accessory dwelling on each of the newly created lots.

a-e) There are no public services available in the area for water, sewer, or storm water drainage. However, the application does not propose any new buildings and the site is already served by an existing well and septic system which must be maintained under a permit by the San Joaquin County Environmental Health Department. Additionally, as an ordinance requirement, the property is required to keep all storm drainage on site and follow all San Joaquin County Public Works rules and requirements pertaining to storm drainage. Any future development utilizing on-site services will also be required to obtain the proper permits for any proposed well or septic system and retain all stormwater on site. Therefore, the project is expected to have a less than significant impact related to new or expanded utilities and service systems.

		Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
XX	. WILDFIRE.	,				
cla	ocated in or near state responsibility areas or lands ssified as very high fire hazard severity zones, would the ject:					
	Substantially impair an adopted emergency response plan or emergency evacuation plan?			\boxtimes		
b)	Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?			\boxtimes		
c)	Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?			\boxtimes		
d)	Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?			\boxtimes		

Loca Than

Impact Discussion:

This project is comprised of two applications: Variance No. PA-2400078 to reduce the minimum lot size in the AG-40 (General Agriculture, 40-acre minimum) zone from 40 acres to 5-acres; and a Minor Subdivision No. PA-2400079 to subdivide an existing 10-acre parcel into two 5-acre parcels. The site currently contains a single-family residence. While the applicant is not proposing to construct any additional dwellings or structures, the resulting subdivision would allow for an additional single-family residence and an accessory dwelling on each of the newly created lots.

a-d) The project location is in a rural, agricultural area north of the City of Tracy, CA, and is not identified as a Community at Risk from Wildfire by Cal Fire's "Fire Risk Assessment Program". Communities at Risk from Wildfire are those places within 1.5 miles of areas of High or Very High wildfire threat as determined from CDF-FRAP fuels and hazard data. Therefore, the impact of wildfires on the project are expected to be less than significant.

VVI MANDATODY FINDINGS OF GIONIFICANOS	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
XXI. MANDATORY FINDINGS OF SIGNIFICANCE a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?			\boxtimes		
b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?			\boxtimes		
c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?			\boxtimes		

This project is comprised of two applications: Variance No. PA-2400078 to reduce the minimum lot size in the AG-40 (General Agriculture, 40-acre minimum) zone from 40 acres to 5-acres; and a Minor Subdivision No. PA-2400079 to subdivide an existing 10-acre parcel into two 5-acre parcels. The site currently contains a single-family residence. While the applicant is not proposing to construct any additional dwellings or structures, the resulting subdivision would allow for an additional single-family residence and an accessory dwelling on each of the newly created lots.

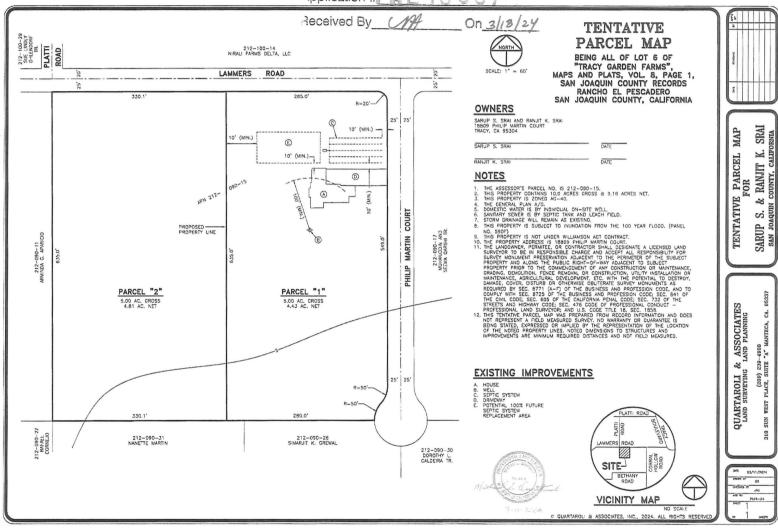

a-c) Review of this project has not indicated any features which might significantly impact the environmental quality of the site and/or surrounding area. Mitigation measures have been identified in areas where a potentially significant impact has been identified and these measures, included as Conditions of Approval, and a Mitigation Monitoring and Reporting Program (MMRP) will reduce these impacts to a less-than-significant level.
