

MOBILEHOME RAMADA REQUIREMENTS
(Temporary Foundations)

1. A ramada may be erected, constructed, or maintained as an accessory to a mobilehome.
2. A ramada or any portion thereof shall have a clearance of not less than 18 inches in a vertical direction above any fuel burning appliance vent or plumbing vent extending through the roof of a mobilehome and not less than six inches in a horizontal direction from each side of a mobilehome.
3. A ramada shall be designed and erected as a freestanding, self-supporting structure meeting the structural requirements for cabanas.
4. A ramada shall not be enclosed or partially enclosed on any side or end, except that sides may be enclosed when the ramada roof is continuous with the roof of a cabana constructed on the sides of the mobilehome.
5. A ventilating opening shall be installed at the highest point in the ramada roof to relieve products of combustion from vents or ducts of fuel burning equipment. Vent openings shall have a minimum cross sectional area of 28 square inches. Chimneys or vents of appliances burning solid or liquid fuel shall extend through the ramada roof surface and shall terminate in an approved roof jack and caps.
