Tips for safe FACE COVERING USE

- Clean hands before and after touching the face covering.
- Remove and store face covering before eating or drinking.
- Wash used face coverings with detergent and hot water, then dry on the hot cycle.
- Use a securely-placed bandana, scarf, or homemade cloth cover.
- Avoid touching the face covering. It should not hang on one ear, around the neck or be pushed to the forehead.
- Always cover your nose and mouth.

Store used face coverings in a bag or bin until they can be laundered.
