A.G. KAWAMURA, SECRETARY
CALIFORNIA DEPARTMENT OF FOOD AND AGRICULTURE
AND
THE HONORABLE BOARD OF SUPERVISORS
SAN JOAQUIN COUNTY

Dear Secretary and Board Members:

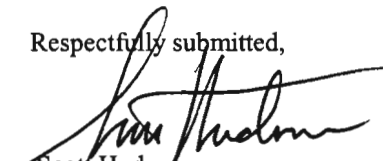

In accordance with Section 2279 of the California Food and Agriculture Code, I am pleased to present the seventy – third Annual Report of Agricultural Production in San Joaquin County. The values shown are estimates based on the most common method of sale for the individual commodity, except for fresh fruits and vegetables where the value is based on the F.O.B. packed price at the shipping point. The figures contained in this report are gross values rather than net return to the grower.

The gross value of agricultural production for 2006 is estimated to be at \$1,684,850,000. This represents a 2.9% decrease from last years production of \$ 1,735,089,000. Notable losses occurred in Fruit and Nut Crops, Livestock and Poultry Products, and in Livestock and Poultry. Although we experienced decreases in these areas there were increases in Field Crops, Seed Crops, Vegetable Crops, Nursery Products and Apiary Products. Highlights for the 2006 crop year are as follows:

- Despite a second consecutive year of losses, milk remained the County's most valuable commodity. Lower prices paid to producers combined with a decrease in production resulted in a decline of 53.5 million dollars.
- Overall tomato acreage was up 10%, moving tomatoes up to the number three crop for 2006.
- July's unexpected heat wave wreaked havoc with sweet corn and pepper crops.
- Prolonged periods of cold temperatures and rainy weather drove asparagus production down 36.1 percent from 2005 yields.
- Lower yields and a reduction in bearing acreage due to variety replacement caused grapes to have an 84.7 million dollar loss.
- A significant boost in dry bean and tomato acreage occurred when late spring rains in the South San Joaquin Valley forced production north.
- With high yields and good prices walnuts achieved an all time high value.

I wish to express my sincere appreciation to all who assisted my biologists and deputies by furnishing the necessary information that made this report possible.

Respectfully submitted,

Scott Hudson
Agricultural Commissioner

SOME INTERESTING WHEAT FACTS

Wheat is being harvested somewhere in the world every month of the year.

Wheat is well adapted to harsh environments and is mostly grown in wind-swept areas too dry and too cold for rice and corn.

A single wheat seed is called a kernel. There are about fifty kernels in a head of wheat, and there are 15,000 to 17,000 kernels of wheat in a pound.

A bushel of wheat weighs 60 pounds and yields about 42 pounds of white flour or enough flour for 73 one-pound loaves of white bread.

The state of California consumes over 118 million bushels of wheat per year.

Wheat flour is an ingredient in many brands of licorice.

There is approximately 5 cents worth of wheat in each loaf of bread sold.

Durum wheat is used to make pasta because of its hard nature, which produces a firm cooked product.

California exports up to 300,000 metric tons of wheat annually. Destinations for California wheat include Bangladesh, Bolivia, Ecuador, Indonesia, Italy, and Peru.

January is national Wheat Bread Month.

Wheat is the only grain with sufficient gluten content to make a raised or leavened loaf of bread.

Cyrus McCormick invented the mechanical reaper in 1831 allowing growers to harvest 8 acres a day compared to 2 acres by hand.

The 1970 Nobel Peace Prize was awarded to Norman Borlaug for developing high-yielding wheat varieties.

SAN JOAQUIN COUNTY'S SHARE OF STATEWIDE PRODUCTION

Listed below are the crops in which San Joaquin County ranked in the top 5 in the State based on gross value during the 2005 crop year. The bars represent San Joaquin County's percentage of the state value for that crop. The numbers in parentheses next to the crop labels show San Joaquin County's ranking for that crop.

SAN JOAQUIN COUNTY'S TOP TEN LEADING CROPS FOR 2006

MILK, ALL	\$261,030,000
GRAPES, ALL	\$205,000,000
TOMATOES, ALL	\$146,330,000
ALMOND MEATS	\$143,440,000
WALNUTS, ENGLISH	\$133,539,000
CHERRIES	\$121,375,000
CATTLE AND CALVES	\$87,363,000
HAY, ALL	\$76,790,000
NURSERY, WOODY ORNAMENTALS	\$58,952,000
ASPARAGUS	\$41,055,000
ALL OTHER CROPS	\$409,976,000

Sustainable Agriculture

Sustainable agriculture is many things to many people. The following are some of the practices used by growers and others in San Joaquin County to further the goals of increasing agriculture's sustainable nature:

Locally Grown -

The Select San Joaquin program encourages consumer awareness of where their food is produced through community outreach activities and point of sale displays. The Agriculture Commissioner issues nearly 100 Certified Producer Certificates for our growers to sell their commodities directly to the consumer.

Environmentally Friendly-

Lodi Rules is an award-winning program hosted by the Lodi-Woodbridge Winegrape Commission that uses a third party certification system to ensure that participants limit pesticide use and practice environmentally "soft" practices. Also, San Joaquin County supports nineteen registered organic growers producing twenty crops.

Preventing Pests -

An average of 125 rated pests are found each year on incoming shipments through various pathways by county biologists. Among these have been West Indian Fruit Fly, Glassy-winged Sharpshooter and dozens of others. Infested shipments are destroyed or returned. Keeping out exotic pests reduces spraying of pesticides and helps to maintain our ecological balance.

Beneficial Organisms-

Growers have erected over 1000 nest boxes in our county to attract barn owls to their orchards and vineyards, helping to keep rodent populations in check. Additionally, thirty "good bugs" have been established by the department of agriculture to control pest insects and invasive weeds.

Educational-

Several "you pick" establishments cater to school children and adults, keeping them in touch with hands-on knowledge of how things grow. Corn mazes and pumpkin patches draw visitors to farms and the Lodi Wine Trail guides connoisseurs through vineyards to sample our county's bounty. These activities showcase agriculture and remind people of the quality of life enhancements farming brings to a community.

A SPECIAL "THANK YOU"

The San Joaquin County Agricultural Commissioner's Office expresses its appreciation to the

and

for their contributions to the 2006 Crop Report. We would also like to thank the
San Joaquin County Cooperative Extension for their assistance.
Without their support the publication of this report would not be possible.
