Stockton, CA 95205

PROJECT TITLE: Administrative Use Permit, Merger, and General Plan Map Amendment No. PA-2400217, -219, -220

PROJECT LOCATION: The project site is on the east of South El Dorado Street., 85 feet south of East Hurd St, French Camp, San Joaquin County. (APN/Address: 193-170-17, -18, -19, -20 / 12 E. Hurd Rd., French Camp) (Supervisory District: 3)

PROJECT DESCRIPTION: An Administrative Use Permit, Merger, and General Plan Map Amendment application This project consists of 3 Planning applications on 4 parcels as follows: • Administrative Use Permit Application PA-2400217: To establish a 4,128 sq. ft. commercial kitchen with drive thru sales. No indoor or outdoor dining amenities. The project will have an entrance driveway off of S. El Dorado Street and 2 exits onto S. Harlan Road. A private onsite well for water, septic system for sanitary sewer and retention pond for storm drainage will be utilized •Merger of Parcels PA-2400219: To merge 4 adjacent parcels into one 0.81 acre parcel. • General Plan Map Amendment PA-2400220: To amend the GP designation of 4 adjacent parcels from I/G (General Industrial) to C/C (Community Commercial).

The Property is zoned C-C (Community Commercial) and the General Plan designation is I/G (General Industrial).

PROponent: Alawdi Zakrya / Elshafei Mahamed

This is a Notice of Intent to adopt a Mitigated Negative Declaration for this project as described. San Joaquin County has determined that through the Initial Study that contains proposed mitigation measures all potentially significant effects on the environment can be reduced to a less than significant level. The Mitigated Negative Declaration and Initial Study can be viewed on the Community Development Department website at www.sjgov.org/commdev under Active Planning Applications.

Date: December 16, 2025

Contact Person:

Alisa Goulart Phone: (209) 468-0222 Fax: (209) 468-3163 Email: alisa.goulart@sjgov.org

INITIAL STUDY/NEGATIVE DECLARATION

[Pursuant to Public Resources Code Section 21080(c) and California Code of Regulations, Title 14, Sections 15070-15071]

LEAD AGENCY: San Joaquin County Community Development Department

PROJECT APPLICANT: Mohamed S. Elshafel

PROJECT TITLE/FILE NUMBER(S): PA-2400217 (AUP), PA-2400219 (ME), and PA-2400220 (GP)

PROJECT DESCRIPTION: This project consists of 3 Planning applications on 4 parcels as follows:

- Administrative Use Permit Application PA-2400217: To establish a 4,128 square foot commercial kitchen to prepare food for sale for takeout only. A drive through will be utilized for pick up. The project will not have indoor or outdoor dining amenities. The project will have an entrance driveway off of S. El Dorado Street and 2 exits onto S. Harlan Road. A private onsite well will be utilized for water and a septic system will provide sanitary sewer. Storm water will be detained on site. (Use Type: Eating and Drinking Establishment – Limited)
- Merger of Parcels PA-2400219: To merge 4 adjacent parcels into one 0.81 acre parcel.
- General Plan Map Amendment PA-2400220: To amend the General Plan designation of 4 adjacent parcels totaling 0.81 acres from I/G (General Industrial) to C/C (Community Commercial) to correspond with the C-C (Community Commercial) zoning.

The project site is comprised of 4 adjacent parcels located on the south side of E. Hurd Street, bordered by S. El Dorado Street on the west side and S. Harlan Road on the east side, in French Camp.

ASSESSOR PARCEL NOS.: 193-170-17, 193-170-18, 193-170-19, and 193-170-20

ACRES: 0.81 acres

GENERAL PLAN: I/G

ZONING: C-C

POTENTIAL POPULATION, NUMBER OF DWELLING UNITS, OR SQUARE FOOTAGE OF USE(S):
A 4,128 square foot commercial building for an Eating and Drinking Establishment – Limited Use.

SURROUNDING LAND USES:

NORTH: Community Commercial (C-C) zoning with nonconforming industrial uses and residences; E. Hurd Street.
SOUTH: Undeveloped Community Commercial zoned, undeveloped parcels; E. Lynn Avenue.
EAST: Southern Pacific Railroad; S. Harlan Road; 2 cemeteries /Agriculture with scattered residences.
WEST: S. El Dorado Street; Interstate 5; S. Manthey Road; Warehouse uses; Agricultural with scattered residences

REFERENCES AND SOURCES FOR DETERMINING ENVIRONMENTAL IMPACTS:

Original source materials and maps on file in the Community Development Department including: all County and City general plans and community plans; assessor parcel books; various local and FEMA flood zone maps; service district maps; maps of geologic instability; maps and reports on endangered species such as the Natural Diversity Data Base; noise contour maps; specific roadway plans; maps and/or records of archeological/historic resources; soil reports and maps; etc.

Many of these original source materials have been collected from other public agencies or from previously prepared EIR's and other technical studies. Additional standard sources which should be specifically cited below include on-site visits by staff (August 1, 2024); staff knowledge or experience; and independent environmental studies submitted to the County as part of the project application.

TRIBAL CULTURAL RESOURCES:

Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1? If so, is there a plan for consultation that includes,

for example, the determination of significance of impacts to tribal cultural resources, procedures regarding confidentiality, etc.?

No

GENERAL CONSIDERATIONS:

1. Does it appear that any environmental feature of the project will generate significant public concern or controversy?

☐ Yes ☒ No

Nature of concern(s): Enter concern(s).

2. Will the project require approval or permits by agencies other than the County?

☐ Yes ☒ No

Agency name(s): Enter agency name(s).

3. Is the project within the Sphere of Influence, or within two miles, of any city?

☒ Yes ☐ No

City: City of Stockton

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

- | | | |
|--|---|---|
| <input type="checkbox"/> Aesthetics | <input type="checkbox"/> Agriculture and Forestry Resources | <input type="checkbox"/> Air Quality |
| <input type="checkbox"/> Biological Resources | <input type="checkbox"/> Cultural Resources | <input type="checkbox"/> Energy |
| <input type="checkbox"/> Geology / Soils | <input type="checkbox"/> Greenhouse Gas Emissions | <input type="checkbox"/> Hazards & Hazardous Materials |
| <input type="checkbox"/> Hydrology / Water Quality | <input type="checkbox"/> Land Use / Planning | <input type="checkbox"/> Mineral Resources |
| <input type="checkbox"/> Noise | <input type="checkbox"/> Population / Housing | <input type="checkbox"/> Public Services |
| <input type="checkbox"/> Recreation | <input type="checkbox"/> Transportation | <input type="checkbox"/> Tribal Cultural Resources |
| <input type="checkbox"/> Utilities / Service Systems | <input type="checkbox"/> Wildfire | <input type="checkbox"/> Mandatory Findings of Significance |

DETERMINATION: (To be completed by the Lead Agency) On the basis of this initial evaluation:

- ☐ I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
- ☒ I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.
- ☐ I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.
- ☐ I find that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.
- ☐ I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

Signature: Alisa Goulart, Associate Planner

Date

EVALUATION OF ENVIRONMENTAL IMPACTS:

- 1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3) Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4) "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from "Earlier Analyses," as described in (5) below, may be cross-referenced).
- 5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
 - a) Earlier Analysis Used. Identify and state where they are available for review.
 - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
- 8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.
- 9) The explanation of each issue should identify:
 - a) the significance criteria or threshold, if any, used to evaluate each question; and
 - b) the mitigation measure identified, if any, to reduce the impact to less than significance.

Issues:

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
<u>I. AESTHETICS.</u>					
Except as provided in Public Resources Code Section 21099, would the project:					
a) Have a substantial adverse effect on a scenic vista?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c) In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Impact Discussion:

- a-b) This project consists of an Administrative Use Permit for a restaurant facility, a General Plan Map Amendment to change the designation to Community Commercial, and a Merger of Parcels to merge the 4 parcels totaling 0.81 acres for which the facility is planned.

The proposed project site is in the community of French Camp, CA, on the south side of E. Hurd Road, bordered by S. El Dorado Street on the west side and S. Harlan Road and the Southern Pacific Railroad tracks on the east side. Pursuant to the 2035 General Plan Background Report, the roads adjacent to the project site are not considered a scenic roadway (General Plan Background Report 2035, Pg. 12-14). The site is undeveloped. There are no historic buildings on site nor rock outcroppings. There are several sites in proximity of the proposed project site that are currently utilized for industrial uses. As a condition of approval, the project will be required to provide landscaping in the form of minimum 10-foot-wide planted areas along the parcel where adjacent to roadways. If approved, the proposed use will be consistent with surrounding uses and is anticipated to have a less than significant impact on the scenic vista and scenic resources.

- c) The proposed site is located in the community of French Camp, within the Sphere of Influence of the City of Stockton. The project site is not considered a scenic vista and is surrounded by industrial and commercial uses. If approved, the proposed use would be consistent with surrounding uses and is anticipated to have a less than significant impact on the existing visual character or quality or public views.
- d) The proposed project will be required to adhere to Lighting and Illumination requirements in San Joaquin County Development Title Section 9-403, which requires shielding of outdoor lighting fixtures so as not to be directly visible from a public street or an adjacent lot with limited exceptions. As a result, the proposed project is not anticipated to create any new source of substantial light or glare affecting day or nighttime views in the area and is anticipated to have a less than significant impact on such views.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
--	--------------------------------------	---	------------------------------------	--------------	---------------------------------

II. AGRICULTURE AND FORESTRY RESOURCES.

In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board. – Would the project:

- | | | | | | |
|--|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|
| a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to nonagricultural use? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| b) Conflict with existing zoning for agricultural use, or a Williamson Act contract? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| d) Result in the loss of forest land or conversion of forest land to non-forest use? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

Impact Discussion:

- a-e) This project consists of an Administrative Use Permit for a restaurant facility, a General Plan Map Amendment to change the designation to Community Commercial, and a Merger of Parcels to merge the 4 parcels totaling 0.81 acres on which the facility is planned.

The project site is currently zoned C-C (Community Commercial) and is not categorized as Prime Farmland, Unique Farmland, or Farmland of Statewide Importance. The Important Farmland Maps, prepared by the California Department of Conservation as part of the Farmland Mapping and Monitoring Program, designate the site as Urban and Built-up Land. The project site is not under a Williamson Act contract.

There are no forest resources or areas zoned for forestlands or timberland, as defined by Public Resources Code and Government Code, located on or near the project site. Therefore, the project will have no impact on forest land or timberland production, nor will it result in the loss or conversion of such land or the conversion of agricultural land. The project is anticipated to have a less than significant impact on agriculture and forestry resources.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
III. AIR QUALITY.					
Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:					
a) Conflict with or obstruct implementation of the applicable air quality plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c) Expose sensitive receptors to substantial pollutant concentrations?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d) Result in substantial emissions (such as those leading to odors) adversely affecting a substantial number of people?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Impact Discussion:

- a-d) This project consists of an Administrative Use Permit for a restaurant facility, a General Plan Map Amendment to change the designation to Community Commercial, and a Merger of Parcels to merge the 4 parcels totaling 0.81 acres on which the facility is planned.

The San Joaquin Valley Unified Air Pollution Control District (SJVAPCD) has been established by the State in an effort to control and minimize air pollution. SJVAPCD has adopted numerous air quality attainment plans that identify measures needed in San Joaquin Valley to attain the increasingly stringent federal standards. The District's plans include emissions inventories that identify sources of air pollutants, evaluations for feasibility of implementing potential opportunities to reduce emissions, sophisticated computer modeling to estimate future levels of pollution, and a strategy for how air pollution will be further reduced.

Referrals were sent to the San Joaquin Valley Air Pollution Control District on March 14, 2025. The District responded in an email dated March 17, 2025, that the District would not likely respond to the referral.

However, the project will be subject to the SJVAPCD's rule and regulations and it will be necessary for the project to meet existing requirements for emissions and dust control as established by SJVAPCD. As a result, any impacts to air quality will be reduced to less-than-significant.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
<u>IV. BIOLOGICAL RESOURCES:</u>					
Would the project:					

a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Impact Discussion:

- a-b, d-f) This project consists of an Administrative Use Permit for a restaurant facility, a General Plan Map Amendment to change the designation to Community Commercial, and a Merger of Parcels to merge the 4 parcels totaling 0.81 acres on which the facility is planned.

Referrals were sent to the San Joaquin Council of Governments (SJCOG) for review on November 5, 2024. SJCOG has determined that the project is subject to and may participate in the San Joaquin Multi-Species Habitat Conservation and Open Space Plan (SJMSCP), and the applicant has confirmed participation. As a result, the proposed project is consistent with the SJMSCP, as amended, which will be reflected in the conditions of project approval for this proposal. Pursuant to the *Final EIR/EIS for San Joaquin County Multi-Species Habitat Conservation and Open Space Plan (SJMSCP)*, dated November 15, 2000, and certified by SJCOG on December 7, 2000, implementation of the SJMSCP is expected to reduce impacts to biological resources resulting from the proposed project to a level of less-than-significant.

- c) Pursuant to the U.S. Fish and Wildlife Service's Wetlands Inventory, the project site does not have any mapped wetlands. Therefore, the project's impact on wetlands is expected to be less than significant.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
<u>V. CULTURAL RESOURCES.</u>					
Would the project:					
a) Cause a substantial adverse change in the significance of a historical resource pursuant to § 15064.5?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to § 15064.5?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c) Disturb any human remains, including those interred outside of dedicated cemeteries?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Impact Discussion:

- a–c) This project consists of an Administrative Use Permit for a restaurant facility, a General Plan Map Amendment to change the designation to Community Commercial, and a Merger of Parcels to merge the 4 parcels totaling 0.81 acres on which the facility is planned.

There are no known historical or archaeological resources on site. Additionally, there are no known human remains located on site. If unique archaeological resources are discovered on the site during project construction, the suite shall be treated in accordance with the provisions of Public Resources Code Section 21083.2. If any historical resources are discovered on site, the developer shall follow the procedures in State CEQA Guidelines Section 15064. In the event human remains are discovered at any point of the proposed project, California state law requires that there shall be no further excavation or disturbance of the site, or any nearby area reasonably suspected to overlie adjacent remains until the coroner of the county has determined the manner and cause of death. Recommendations concerning the treatment and disposition of the human remains shall have been made to the person responsible for the excavation (California Health and Safety Code - Section 7050.5). At the time development, if Human burials are found to be of Native American origin, the developer shall follow the procedures pursuant to Title 14, Division 6, Chapter 3, Article 5, Section 15064.5(e) of the California State Code of Regulations.

As a result, the project is anticipated to have a less than significant impact on cultural resources.

VI. ENERGY.

Would the project:

a) Result in a potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy, or wasteful use of energy resources, during project construction or operation?

☐
☐
☒
☐
☐

b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?

☐
☐
☒
☐
☐

Impact Discussion:

- a-b) This project consists of an Administrative Use Permit for a restaurant facility, a General Plan Map Amendment to change the designation to Community Commercial, and a Merger of Parcels to merge the 4 parcels totaling 0.81 acres on which the facility is planned.

The California Energy Code (also titled The Energy Efficiency Standards for Residential and Non-residential Buildings) was created by the California Building Standards Commission in response to a legislative mandate to reduce California's energy consumption. The code's purpose is to advance the state's energy policy, develop renewable energy sources and prepare for energy emergencies. These standards are updated periodically by the California Energy Commission. The code includes energy conservation standards applicable to most buildings throughout California. These requirements will be applicable to the proposed project ensuring that any impact to the environment due to wasteful, inefficient, or unnecessary consumption of energy will be less than significant and preventing any conflict with state or local plans for energy efficiency and renewable energy.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
<u>VII. GEOLOGY AND SOILS.</u>					
Would the project:					
a) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
ii) Strong seismic ground shaking?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
iii) Seismic-related ground failure, including liquefaction?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
iv) Landslides?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b) Result in substantial soil erosion or the loss of topsoil?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d) Be located on expansive soil and create direct or indirect risks to life or property?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e) Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Impact Discussion:

This project consists of an Administrative Use Permit for a restaurant facility, a General Plan Map Amendment to change the designation to Community Commercial, and a Merger of Parcels to merge the 4 parcels totaling 0.81 acres on which the facility is planned.

The Soil Survey of San Joaquin County classifies the soil on the parcel as Honcut sandy loam, 0 to 2 percent slopes.

Honcut sandy loam consists of well drained soils on nearly level soils on alluvial fans. These soils are very deep. Permeability is moderately rapid; available water capacity is moderate. Honcut sandy loam is well suited for irrigated row, field, or orchard and vineyard crops. Honcut soil has a storer index rating of 95 and a land capability of "I" for irrigated and "IV-c1" for non-irrigated.

- a) According to the California Department of Conservation's California Geological Survey, the project site is not located within an earthquake fault zone. However, like other areas located in seismically active Northern California, the project area is susceptible to strong ground shaking during an earthquake, and the site would not be affected by ground shaking more than any other area in the region. The project site is relatively flat and is not anticipated to directly or indirectly cause potential substantial adverse effects related to seismic-related ground failure or landslides. Therefore, any related impacts are anticipated to be less than significant.

The Project development would be required to comply with the most recent version of the California Building Code (CBC), which contains universal standards related to seismic load requirements and is codified within the San Joaquin County Ordinance Code under Section 8-1000. In addition, a soils report is required pursuant to CBC § 1803 for foundations and CBC appendix § J104 for grading. All recommendations of the Soils Report will be incorporated into the construction drawings. As a result, impacts associated with seismic ground shaking or possible ground liquefaction are expected to be less than significant.

- b-c) As part of the project design process, a soils report will be required for grading and foundations and all recommendations from a soils report must be incorporated into the construction plans. As a result of these grading recommendations, which are required by the California Building Code (CBC), the project would not be susceptible to the effects of any loss of topsoil, soil erosion, potential lateral spreading, subsidence, or liquefaction. Compliance with the CBC and the engineering recommendations in the site-specific soils report would ensure structural integrity in the event that seismic-related issues are experienced at the project site. Therefore, impacts associated with unstable geologic units are expected to be less than significant.
- d) The Soil Survey of San Joaquin County classifies the project site soil as having low potential for expansive soil. The Building Division of the Community Development Department will review the required soil study and will not issue a Building Permit if it is found the development of the site could lead to the risk of a loss of life because of the expansiveness of the soil. As a result, it can be anticipated that any risk to life would be considered less than significant.
- e) The project site is proposing to construct a septic system and leach line system on the site for wastewater disposal. These improvements require a permit from the San Joaquin County Environmental Health Department and are required to meet the county's standards. As such, the project is expected to have a less than significant impact related to adequately supporting a wastewater system.
- f) The project area has not been determined to contain significant historic or prehistoric archeological artifacts that could be disturbed by potential future site development. The project site also does not contain any known unique geologic features. Therefore, damage to unique paleontological resources, sites or geologic features is expected to be less than significant.

Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
--------------------------------------	---	------------------------------------	--------------	---------------------------------

VIII. GREENHOUSE GAS EMISSIONS.

Would the project:

a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?

<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	-------------------------------------	--------------------------	--------------------------

b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?

<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	-------------------------------------	--------------------------	--------------------------

Impact Discussion:

a-b) This project consists of an Administrative Use Permit for a restaurant facility, a General Plan Map Amendment to change the designation to Community Commercial, and a Merger of Parcels to merge the 4 parcels totaling 0.81 acres on which the facility is planned.

Emissions of GHGs contributing to global climate change are attributable in large part to human activities associated with the industrial/manufacturing, utility, transportation, residential, and agricultural sectors. Therefore, the cumulative global emissions of GHGs contributing to global climate change can be attributed to every nation, region, and city, and virtually every individual on earth. An individual project's GHG emissions are at a micro-scale level relative to global emissions and effects to global climate change; however, an individual project could result in a cumulatively considerable incremental contribution to a significant cumulative macro-scale impact. As such, impacts related to emissions of GHG are inherently considered cumulative impacts.

Implementation of the project would cumulatively contribute to increases of GHG emissions. Estimated GHG emissions attributable to future development would be primarily associated with increases of carbon dioxide (CO₂) and, to a lesser extent, other GHG pollutants, such as methane (CH₄) and nitrous oxide (N₂O) associated with area sources, mobile sources or vehicles, utilities (electricity and natural gas), water usage, wastewater generation, and the generation of solid waste. The primary source of GHG emissions for the project would be mobile source emissions. The common unit of measurement for GHG is expressed in terms of annual metric tons of CO₂ equivalents (MTCO₂e/yr).

As noted previously, the project will be subject to the rules and regulations of the SJVAPCD. The SJVAPCD has adopted the *Guidance for Valley Land- use Agencies in Addressing GHG Emission Impacts for New Projects under CEQA* and the *District Policy – Addressing GHG Emission Impacts for Stationary Source Projects Under CEQA When Serving as the Lead Agency*.¹ The guidance and policy rely on the use of performance-based standards, otherwise known as Best Performance Standards (BPS) to assess significance of project specific greenhouse gas emissions on global climate change during the environmental review process, as required by CEQA. To be determined to have a less-than-significant individual and cumulative impact with regard to GHG emissions, projects must include BPS sufficient to reduce GHG emissions by 29 percent when compared to Business As Usual (BAU) GHG emissions. Per the SJVAPCD, BAU is defined as projected emissions for the 2002-2004 baseline period. Projects which do not achieve a 29 percent reduction from BAU levels with BPS alone are required to quantify additional project-specific reductions demonstrating a combined reduction of 29 percent. Potential mitigation measures may include, but not limited to: on-site renewable energy (e.g. solar photovoltaic systems), electric vehicle charging stations, the use of alternative-fueled vehicles, exceeding Title 24 energy efficiency standards, the installation of energy-efficient lighting and control systems, the installation of energy-efficient mechanical systems, the installation of drought-tolerant landscaping, efficient irrigation systems, and the use of low-flow plumbing fixtures.

It should be noted that neither the SJVAPCD nor the County provide project-level thresholds for construction-related GHG emissions. Construction GHG emissions are a one-time release and are, therefore, not typically expected to generate a significant contribution to global climate change.

San Joaquin Valley Air Pollution Control District. *District Policy Addressing GHG Emission Impacts for Stationary Source Projects Under CEQA When Serving as the Lead Agency*. December 17, 2009

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
<u>IX. HAZARDS AND HAZARDOUS MATERIALS.</u>					
Would the project:					
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
g) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Impact Discussion:

- a-b) This project consists of an Administrative Use Permit for a restaurant facility, a General Plan Map Amendment to change the designation to Community Commercial, and a Merger of Parcels to merge the 4 parcels totaling 0.81 acres on which the facility is planned.

The project is not expected to transport, use, or dispose hazardous material, nor release hazardous material into the environment. Before any hazardous materials/waste can be stored or used onsite, the owner/operator must report the use or storage of these hazardous materials to the California Environmental Reporting System (CERS) and comply with the laws and regulations related to the CUPA (Certified Unified Program Agency) program administered by the San Joaquin County Environmental Health Department. In this way, impacts related to the use, transport, or disposal of hazardous materials are expected to be less than significant.

- c) The proposed project is not located within one quarter mile of an existing or proposed school. French Camp Elementary, the nearest school, is located approximately 0.58 miles from the project site. The school is not situated along any major transportation routes anticipated to be used by vehicles associated with the proposed project. Therefore, no impact to existing schools is anticipated.
- d) The project site is not listed as a hazardous materials site on the California Department of Toxic Substances Control EnviroStor database map, compiled pursuant to Government Code 65962.5 and as noted above, does not include the use or storage of hazardous materials on-site. Therefore, the project is anticipated to have no impact on creating a

significant hazard to the public or the environment.

- e) The project site is located within the Traffic Pattern Zone (TPZ) of the Stockton Metropolitan Airport and is approximately 2.0 miles southwest of the airport runway. Pursuant to the San Joaquin County Airport Land Use Compatibility Plan (Amended 2018), the project site is located outside of the current noise exposure contour and the future noise exposure contour. Therefore, due to the project site's distance from the airport noise contours, the project's risk of exposing people residing or working in the project area to safety hazards or excessive noise is less than significant.
- f) The project site is located on S. El Dorado Street, and has a local classification of Minor Arterial, defined as a street that provides direct access between various sectors of the city and residential area.

The project site is located approximately 0.25 miles south of the E. Matthews Road Interstate 5 Interchange and 0.15 miles north of the S. El Dorado Street Interstate 5 Interchange. The project site is located on a roadway that will be used for evacuation, but all work and work equipment as well as operations, will be on site with no interference with traffic. Therefore, the project's anticipated impact on emergency response or evacuation plans is expected to be less than significant.

- g) The project is located in the community of French Camp and is not identified as a Community at Risk from Wildfire by Cal Fire's "Fire Risk Assessment Program". Communities at Risk from Wildfire are those places within 1.5 miles of areas of High or Very High wildfire threat as determined from CDF-FRAP fuels and hazard data. Therefore, the impact of wildfires on the project site, including people or structures, is expected to be less than significant.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
<u>X. HYDROLOGY AND WATER QUALITY.</u>					
Would the project:					
a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
i) result in substantial erosion or siltation on- or off-site;	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
ii) substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site;	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
iii) create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
iv) impede or redirect flood flows?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Impact Discussion:

- a-b,e) This project consists of an Administrative Use Permit for a restaurant facility, a General Plan Map Amendment to change the designation to Community Commercial, and a Merger of Parcels to merge the 4 parcels totaling 0.81 acres on which the facility is planned.

The project would not result in substantial changes to water quality or groundwater management, and therefore would not conflict with or obstruct implementation of water quality control plan or sustainable groundwater management plan. Development of the site as it relates to water quality would be subject to the rules and requirements of the Environmental Health Department, and subject to the rules and requirements of the Department of Public Works related to storm drainage and groundwater. The developer will be responsible for paying Water Impact Mitigation Fees which finance San Joaquin County's (County) share of the construction cost for the "New Melones Water Conveyance Project," which is intended to mitigate the impact of ground and surface water depletion resulting from new development within the fee area. Therefore, the project is anticipated to have a less than significant impact on impacts to groundwater supplies and impacts to the sustainability of groundwater management of the basin.

- c) The project site is located approximately 0.75 miles southwest of French Camp Slough. Construction of the proposed project would result in grading and soil-disturbing activities and the installation of new impervious surfaces. A grading permit will be required which requires plans and grading calculations, including a statement of the estimated quantities of excavation and fill, prepared by a Registered Design Professional. The grading plan must show the existing grade

and finished grade in contour intervals of sufficient clarity to indicate the nature and extent of the work and show in detail that it complies with the requirements of the California Building Code (CBC). The plans must also show the existing grade on adjoining properties in sufficient detail to identify how grade changes will conform to the requirements of the CBC. A drainage plan must also be submitted for review and approval, prior to release of a building permit. In this way, any impacts to the existing drainage pattern of the site will be less than significant. Additionally, the proposed project includes an onsite surface water runoff retention pond which will be required to adhere to the development standards of the Public Works Department. As a result, any impacts are anticipated to be less than significant.

- d) The flood zone information contained on the San Joaquin County Flood Information viewer is provided using the Digital Flood Insurance Rate Map data received from the US Department of Homeland Security, Federal Emergency Management Agency (FEMA). Pursuant to this information, the area containing the project site is not in a Special Flood Hazard Zone. Development of this project will not require compliance with Development Title Section 9-1605 regarding flood hazards. The project site is also not located in a tsunami nor a seiche zone. Therefore, the possibility of pollutants being released from project inundation is expected to be less than significant.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
<u>XI. LAND USE AND PLANNING.</u>					
Would the project:					
a) Physically divide an established community?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Impact Discussion:

- a) This project consists of an Administrative Use Permit for a restaurant facility, a General Plan Map Amendment to change the designation to Community Commercial, and a Merger of Parcels to merge the 4 parcels totaling 0.81 acres on which the facility is planned.

The project does not include construction of any feature that would impair mobility within an existing community, nor does it include removal of a means of access between a community and outlying area. The project site is not used as a connection between established communities. Instead, connectivity with the area surrounding the project is facilitated via local roadways. Therefore, the project will not result in dividing an established community.

- b) The project is to develop the parcel with a restaurant facility for take-out service only. This is a permitted use in the Community Commercial (C-C) zone with a conditionally-approved land use permit therefore, the proposed use will be consistent with all land use policies and regulations of the County Development Code and 2035 General Plan, therefore, the project's impact on the environment due to land use conflict is expected to be less than significant.

Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
--------------------------------------	---	------------------------------------	--------------	---------------------------------

XII. MINERAL RESOURCES.

Would the project:

- | | | | | | |
|--|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|
| a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| b) Result in the loss of availability of a locally- important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

Impact Discussion:

- a-b) This project consists of an Administrative Use Permit for a restaurant facility, a General Plan Map Amendment to change the designation to Community Commercial, and a Merger of Parcels to merge the 4 parcels totaling 0.81 acres on which the facility is planned.

The proposed project will not result in the loss of availability of a known mineral resource of a resource recovery site because the site does not contain minerals of significance or known mineral resources. San Joaquin County applies a mineral resource zone (MRZ) designation to land that meets the significant mineral deposits definition by the State Division of Mines and Geology. The project site is designated MRZ-1 which is applied to areas where adequate geologic information indicates that no significant mineral deposits are present, or where it is judged that little likelihood exists for their presence. Therefore, the proposed project will have a less than significant impact on the availability of mineral resources or mineral resource recovery sites within San Joaquin County.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
<u>XIII. NOISE.</u>					
Would the project result in:					
a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b) Generation of excessive ground borne vibration or ground borne noise levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c) For a project within the vicinity of a private airstrip or an airport land use plan, or where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Impact Discussion:

- a-b) This project consists of an Administrative Use Permit for a restaurant facility, a General Plan Map Amendment to change the designation to Community Commercial, and a Merger of Parcels to merge the 4 parcels totaling 0.81 acres on which the facility is planned.
- The Noise Contour Map depicts the project site in the 65dB noise contour of Interstate 5, which extends from Interstate 5 east to the Union Pacific Railroad tracks. Noise and vibration resulting from construction of the project may exceed the existing noise level, however, noises from construction activities are exempt from noise standards provided the construction occurs no earlier than 6:00 A.M. and no later than 9:00 P.M. Operation of the proposed project would be subject to the Development Title standards found in Section 9-404.040. Therefore, noise impacts from the proposed project are expected to be less than significant.
- c) The project site is located within the Traffic Pattern Zone (TPZ) of the Stockton Metropolitan Airport and is approximately 2.0 miles southwest of the airport runway. Pursuant to the San Joaquin County Airport Land Use Compatibility Plan (Amended 2018), the project site is located outside of the current noise exposure contour and the future noise exposure contour. Therefore, due to the project site's distance from the airport noise contours, the project's risk of exposing people residing or working in the project area to safety hazards or excessive noise is less than significant.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
<u>XIV. POPULATION AND HOUSING.</u>					
Would the project:					

- | | | | | | |
|---|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|
| a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

Impact Discussion:

- a-b) This project consists of an Administrative Use Permit for a restaurant facility, a General Plan Map Amendment to change the designation to Community Commercial, and a Merger of Parcels to merge the 4 parcels totaling 0.81 acres on which the facility is planned.

The project will not induce substantial population growth in the area either directly or indirectly because the project is not anticipated to result in a significant increase in the number of jobs available. The proposed project would not displace substantial numbers of people or existing housing, necessitating the construction of replacement housing elsewhere because no residences will be removed. Therefore, the project's impact on population and housing is expected to be less than significant.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
<u>XV. PUBLIC SERVICES.</u>					
a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Fire protection?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Police protection?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Schools?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Parks?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Other public facilities?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Impact Discussion:

- a) This project consists of an Administrative Use Permit for a restaurant facility, a General Plan Map Amendment to change the designation to Community Commercial, and a Merger of Parcels to merge the 4 parcels totaling 0.81 acres on which the facility is planned.

The project site is within the French Camp - McKinley Fire District and is served by the San Joaquin County Sheriff's Office for police protection. A referral requesting comments was sent to both agencies and no response was received. The proposed project is not anticipated to result in substantial adverse physical impacts to existing service ratios, response times or other performance objectives for fire protection or police protection. The site is also within the Manteca Unified School District but, because there is no housing involved in this project, nor does the proposed use require any additional park area, it is expected that the project will not impact schools and parks. Therefore, the proposed project is anticipated to have a less than significant impact on public services.

Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
--------------------------------------	---	------------------------------------	--------------	---------------------------------

XVI. RECREATION.

a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	--------------------------	-------------------------------------	--------------------------

b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	--------------------------	-------------------------------------	--------------------------

Impact Discussion:

- a-b) This project consists of an Administrative Use Permit for a restaurant facility, a General Plan Map Amendment to change the designation to Community Commercial, and a Merger of Parcels to merge the 4 parcels totaling 0.81 acres on which the facility is planned.

The proposed project will not substantially increase the use of existing neighborhood and regional parks or other recreational facilities because no increase in housing or people is associated with this application. Additionally, the project does not include proposed recreation facilities or require the construction or expansion of recreational facilities, which might have an adverse physical effect on the environment. As a result, no impacts to recreation facilities are anticipated.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
<u>XVII. TRANSPORTATION.</u>					
Would the project:					
a) Conflict with a program plan, ordinance, or policy addressing the circulation system, including transit, roadways, bicycle, and pedestrian facilities?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b) Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d) Result in inadequate emergency access?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Impact Discussion:

- a) This project consists of an Administrative Use Permit for a restaurant facility, a General Plan Map Amendment to change the designation to Community Commercial, and a Merger of Parcels to merge the 4 parcels totaling 0.81 acres on which the facility is planned.

The project site is located in the community of French Camp, CA, bordered by S. El Dorado Street on the west side and S. Harlan Road on the east side. S. El Dorado Street in French Camp is classified as a Minor Arterial roadway and merges with Interstate 5 approximately 0.7 miles south of the project site. S. Harlan Road in French Camp is classified as a Local roadway.

The project is not expected to generate more than 50 vehicles an hour therefore a traffic study was not required. A project referral was sent to the Department of Public Works on November 5, 2024. Public Works responded on March 28, 2025, with the standard requirements for encroachment permits and driveway improvement standards. The developer will be responsible for payment of Traffic Mitigation Impact Fees as well as Regional Traffic Impact Fees, which go towards funding transportation improvements and transportation facilities to accommodate new development.

The project will not alter the existing transportation facilities; as such, its installation would not lead to conflicts with transportation plans and ordinances related to these roads. There are no existing or planned pedestrian facilities, bicycle facilities, or transit facilities in the project vicinity therefore, the project's impact on pedestrian, bicycle or transit facilities is expected to be less-than-significant.

- b) The project would have a less-than-significant impact on Vehicle Miles Traveled (VMT) based on the San Joaquin County Transportation Analysis Guidelines of September 2020, which state that locally serving retail projects and retail projects that are less than 50,000 square feet are presumed to have a less-than-significant VMT impact. The project includes an Administrative Use Permit for a take-out only restaurant kitchen consisting of a 4,128 square foot structure. The project will serve the community of French Camp as well as the daytime population consisting of workers in the industrial and commercial surrounding area. Therefore, the project is not expected to conflict or be inconsistent with CEQA Guidelines section 15064.3(b).
- c) The proposed site plan provides vehicles with adequate connectivity between adjacent streets and the project area. There are no curves along either side of the driveway so adequate sight distance can be maintained. The proposed project would not substantially increase hazards on-site due to a design feature, nor would the project inhibit emergency access to the site or surrounding uses. The project will be subject to the Department of Public Works' review process for the adequacy of circulation patterns in preventing the creation or increase of on-site hazards. There is space enough on site for vehicle queuing without creating interference with traffic on S. El Dorado Street.

The use is a drive-thru restaurant with no on-site consumption of goods. The project location is zoned Community Commercial which permits this use. Therefore, the zoning and use will be compatible with the area.

- . d) All driveways and drive aisles on-site would be a minimum of 15 feet wide for one-way traffic and 25 feet wide for two-way traffic to comply with the Development Title requirement for vehicle access and travel. A driveway and circulation route that meets the San Joaquin County Fire Chiefs' Association guidelines for providing fire apparatus access as required by the California Fire Code (CFC) is required. Therefore, site access will provide adequate space for fire trucks and emergency vehicles to enter and turn around, and the project's impact on emergency access is expected to be less than significant.
- .

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
<u>XVIII. TRIBAL CULTURAL RESOURCES.</u>					
a) Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:					
i) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Impact Discussion:

- a) This project consists of an Administrative Use Permit for a drive-thru only restaurant facility, a General Plan Map Amendment to change the designation to Community Commercial, and a Merger of Parcels to merge the 4 parcels totaling 0.81 acres on which the facility is planned.

The project site is undeveloped; therefore, no buildings are listed on the State Office of Historic Preservation California Register or the National Register of Historic Places. Therefore, the project will not result in a substantial adverse change in the significance of a historical resource as defined by CEQA.

On November 5, 2024, referrals were sent to United Auburn Indian Community, California Valley Miwok Tribe, North Valley Yokuts Tribe, and Buena Vista Rancheria for review. No responses were received. In the event human remains are discovered at any point of the project, California state law requires that there shall be no further excavation or disturbance of the site, or any nearby area reasonably suspected to overlie adjacent remains until the coroner of the county has determined the manner and cause of death. Recommendations concerning the treatment and disposition of the human remains shall have been made to the person responsible for the excavation (California Health and Safety Code - Section 7050.5). At the time development, if Human burials are found to be of Native American origin, the developer shall follow the procedures pursuant to Title 14, Division 6, Chapter 3, Article 5, Section 15064.5(e) of the California State Code of Regulations.

As a result, the project is anticipated to have a less than significant impact on cultural resources.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
<u>XIX. UTILITIES AND SERVICE SYSTEMS.</u>					
Would the project:					
a) Require or result in the relocation or construction of new or expanded water, wastewater treatment, or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c) Result in a determination by the wastewater treatment provider, which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Impact Discussion:

- a-e) This project consists of an Administrative Use Permit for a restaurant facility, a General Plan Map Amendment to change the designation to Community Commercial, and a Merger of Parcels to merge the 4 parcels totaling 0.81 acres on which the facility is planned.

There are no public services available in the area for water, sewer, or storm water drainage. The application is proposing an on-site septic system for wastewater, an on-site well for water, and an on-site retention basin for storm water drainage. The proposed well and septic system must be maintained under a permit by the San Joaquin County Environmental Health Department. Additionally, as an ordinance requirement, the property is required to keep all storm drainage on site and follow all San Joaquin County Public Works rules and requirements pertaining to storm drainage. A December 2025 revision to the Development Title removed the requirement for parcels under 2 acres to be able to connect to a public storm drain system making it possible for this project development. As a result, impacts to utility and service systems are expected to be less than significant.

- d-e) The project site is currently within the boundaries of Republic Services, one of five solid waste collectors providing service under franchise to San Joaquin County. The San Joaquin County Code requires that solid waste be collected from residential generators a minimum of once a week, and at least twice a week for commercial and industrial generators (San Joaquin County 2016a). Solid waste is transported and disposed of primarily at three active sanitary landfills in San Joaquin County. The North County Landfill on East Harney Lane has available capacity to 2048, and the Foothill Sanitary Landfill on North Waverly Road has available capacity to 2082 (CalRecycle 2021). The Forward Landfill on Austin Road near Stockton was to have reached its capacity in 2020; however, the County Board of Supervisors recently approved an expansion of Forward Landfill that would extend its life to 2036 (Crunden 2020). California Senate Bill 1383 (SB 1383) requires jurisdictions in California to recycle organic waste, including paper, cardboard, yard materials, food scraps, and food-soiled paper with a goal of diverting 75% of organics from reaching the landfill by 2025. San Joaquin County passed SB 1383 Organic Waste Diversion Ordinance in February of 2022 mandating that business must comply with SB 1383 mandates by 1) subscribing to a SB 1383 compliant waste collection system through a licensed collector; 2) qualifying for a waiver; or, 3) utilizing acceptable alternative compliance methods. In this way, the project is expected to be compliant with federal, state, and local management and reduction statutes and regulations related to solid waste.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
<u>XX. WILDFIRE.</u>					
If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:					
a) Substantially impair an adopted emergency response plan or emergency evacuation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Impact Discussion:

- a-d) This project consists of an Administrative Use Permit for a restaurant facility, a General Plan Map Amendment to change the designation to Community Commercial, and a Merger of Parcels to merge the 4 parcels totaling 0.81 acres on which the facility is planned.

The project location is in an area south of the City of Stockton, in unincorporated French Camp and is not identified or near a Community at Risk from Wildfire by Cal Fire's "Fire Risk Assessment Program". Communities at Risk from Wildfire are those places within 1.5 miles of areas of High or Very High wildfire threat as determined from CDF-FRAP fuels and hazard data. Therefore, no impact related to wildfires are anticipated.

Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
--------------------------------------	---	------------------------------------	--------------	---------------------------------

XXI. MANDATORY FINDINGS OF SIGNIFICANCE

a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?

<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	-------------------------------------	--------------------------	--------------------------

b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	--------------------------	-------------------------------------	--------------------------

c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	--------------------------	-------------------------------------	--------------------------

Impact Discussion:

- a-c) Review of this project has not indicated any features which might significantly impact the environmental quality of the site and/or surrounding area. Mitigation measures have been identified in areas where a potentially significant impact has been identified and these measures, included as conditions of approval, will reduce these impacts to a less than significant level.

MITIGATION MONITORING AND REPORTING PLAN
