Dear members of the San Joaquin County community:

Since beginning my career with the San Joaquin County District Attorney's Office in 1987, I have fought hard to promote public safety, provide support and healing for victims, and to hold accountable those that harm others. My office is committed to ensuring that all communities feel safe and protected and that equal justice is provided for all, regardless of circumstances. Releasing the 2020 Data Report is part of our commitment to the community. The report describes the work of District Attorney's Office, the nature of cases prosecuted, and who is impacted by the criminal justice system.

This companion report provides similar, historic data from 2017-2019. Combined, these reports represent our efforts to be transparent about the work and activities of the District Attorney's Office and the role my office plays in promoting safety, justice, and healing for the victims of harm. The data in this report provides yearly snapshots of case related data including referrals, filings, and the demographics of victims and defendants. Case data is also broken down for certain types of crimes, showing trends related to level and type of crime.

I invite you to look through the data contained in these reports, conduct your own analysis, and bring us your input and feedback. For more context on the work of the District Attorney's Office, we encourage you to listen to our podcast, *Come to the Table*, featuring conversations with local partners and community members. The District Attorney's Office is also available via our social media platforms and websites. The community can find updates on our work, resources, events, and opportunities to discuss important issues with myself and members of the administration.

I recognize these are the first steps in a more lengthy conversation about safety and justice that all of us need to be having with each other, from community members to law enforcement professionals. These are difficult conversations, but I am committed to listening and learning from all of you and providing information to enrich these discussions. Finally, it is important to keep in mind that some statistics are challenging; and when the data reveals a problem change must occur. This requires all of us working together to advance new strategies to reduce violence and improve safety. These realities should not deter us from working together to improve safety and well-being for our community - they should inspire us to do more. So I invite you to pull up a chair, come to the table, and let's talk about "Justice for All" in the 21st century.

Tori Verber Salazar
