## Emergency Medical Services Agency

---

### Memorandum

TO: All Interested Parties

FROM: Leon Brown, MBA, EMS Analyst

DATE: March 21, 2025

SUBJECT: American Medical Response (AMR) Exclusive Operating Area Ambulance Compliance Report

This EMS Agency Report on the Exclusive Operating Area Zone X and the contract compliance for the Emergency Ambulance Provider American Medical Response (AMR) for the months of January and February 2025, provides an in-depth review of AMR's response time performance. The performance agreement between SJCEMSA and AMR establishes accountability for meeting specific response time standards and provides the SJCEMSA with complete access to data and information on AMR's operational, clinical, and administrative performance.

SJCEMSA reviews each late response correction or exemption to determine if a delay in response is attributable to factors outside of the control of the ambulance service provider. Approved exemption requests are not included in response time compliance calculations for the assessment of fines. SJCEMSA ensures transparency by including in this report response time performance with and without, the application of exemptions for late responses.

While this report provides detailed response time compliance information for each of the six X-Zones, it is important to note that ninety percent (90%) of the urban Red Lights and Siren (RLS) calls, when combining data for all X-Zones, have an average response time of ten minutes and five seconds during the two-month period. This response performance is achieved without considering any late exemption requests.

The complete compliance report for January and February 2025 may be viewed or downloaded from the SJCEMSA website: <http://www.sjgov.org/departments/ems>
