

Protect your retirement account

Setting up your online access can help protect against fraud.

Cybercriminals are quite resourceful. They can use information they find elsewhere to establish an account in your name. But if you established your online access before they can, you can rest easier, knowing we've built an extra wall of security around your account.

There's a wealth of additional resources available with your online access.

In addition to fraud protection, registering with your retirement plan's website gives you access to tools and information such as:

- My Interactive Retirement PlannerSM to help you create a personalized savings road map and your Retirement Readiness Report, personalized with your goals and opportunities
- My Investment PlannerSM to help you identify investment options that may be right for you
- Tools to help you research investment options, and videos for on-demand learning
- Plan communications, including recent quarterly statements and newsletters

Protect your retirement account

To set up your online access, find your account number on your quarterly statement or welcome packet and then scan this QR code. Or visit nrsforu.com/register.

This material is not a recommendation to buy or sell a financial product or to adopt an investment strategy. Investors should discuss their specific situation with their financial professional.

Investing involves market risk, including possible loss of principal. No investment strategy or program can guarantee to make a profit or avoid loss. Actual results will vary depending on your investment and market experience.
