

DAVID KAMPER  
South San Joaquin Irrigation Division 3 Board

AGE: 63

Occupation: Farmer/Businessman

Many issues and challenges confront us now and will continue to be important in the foreseeable future. As owners of a senior right to river flows, we are targets to most California water purveyors. No other commodity is as important to Californians as water. We are benefactors of our forefathers' wisdom in securing both the rights and a system that provides most of our needs. We need to guard these rights. As an almond grower and small businessman, I have a good understanding of how the district operates and how it can be improved. The water treatment plant is an excellent way that S.S.J.I.D. is protecting our water rights and providing city residents with more value and benefits. Our effort to provide electrical services is another example of how to benefit the community. Let's continue to improve the dependability of the system and improve access to the water for more efficient uses through more reliability as in our Div. 9 pressurized system (sprinklers & drip). These kinds of improvements benefit everyone by boosting crops and more importantly, save our underground water.

I enjoy serving as your director; please support me with your vote.
