

RAMON YEPEZ
Occupation: Data Scientist/Economist

Age: 32

My education and work experience have equipped me with the tools to make Lodi more equitable and inclusive. My work experience includes the USDA, the U.S. Embassy in Madrid, and an economic development organization. My degrees in Economics and Data Science from University of the Pacific will help me manage the budget responsibly. Because of my work experience, I know how to bring new jobs to Lodi.

Raised on the East Side, I am ready for the privilege to represent my neighborhood. I will make sure that your voice is heard at City Hall. District 4 has been neglected for a long time - it's time we change that. We should have a say in decisions that affect us.

We need representatives who are part of our community. I am the most qualified to represent our district because I am part of the community and my education and work experience will aid me in solving Lodi's problems. I will be a proud and effective advocate. I will focus on: our decaying infrastructure; effective solutions to homelessness; and attracting businesses and jobs to our neighborhoods.

With your vote, we will make history together. Our votes and our voices count, too!
