Dates:
Tuesday August 18, 2015 - 12:00-16:00
Friday August 21, 2015 - 12:00-16:00

Intended Audience:
EMT and Paramedic

Course Content
Anatomy review of upper and lower airways in both adults and pediatric, and training on performing difficult airway intubations and handling of unmanageable airways.

Objective
Participants will review anatomy of airway in both adult and pediatric patients, learn techniques to perform difficult intubations and unmanageable airways. Perform the techniques taught in a classroom setting.
