PURPOSE:

The purpose of this policy is to standardize and establish par levels for the medication and equipment available on EMS vehicles in San Joaquin County.

AUTHORITY:

Health and Safety Code, Division 2.5, Section 1797.220 & 1798 et seq.;

DEFINITIONS:

A. “Advanced Life Support” or “ALS” means special services designed to provide definitive prehospital emergency medical care, including, but not limited to, cardiopulmonary resuscitation, cardiac monitoring, cardiac defibrillation, advanced airway management, intravenous therapy, administration of specified drugs and other medicinal preparations, and other specified techniques and procedures administered by authorized personnel under the direct supervision of a base hospital as part of a local EMS system at the scene of an emergency, during transport to an acute care hospital, during inter-facility transfer, and while in the emergency department of an acute care hospital until responsibility is assumed by the emergency or other medical staff of that hospital.

B. “AMB” means ambulance.

C. “Basic life support” or “BLS” means emergency first aid and cardiopulmonary resuscitation procedures which, as a minimum, include recognizing respiratory and cardiac arrest and starting the proper application of cardiopulmonary resuscitation to maintain life without invasive techniques until the victim may be transported or until advanced life support is available.

D. “Critical Care Transport” or “CCT” means an ALS ambulance staffed with two attendants: a paramedic and an authorized register nurse.

E. “EMS Providers” means an ambulance service or fire department/fire district authorized to provide emergency medical services (EMS) in San Joaquin County.

F. “EMS Response Vehicle” means all ambulances and any fire apparatus or other motor vehicle used to respond to EMS requests.

G. “EMT Optional Skill Provider” means an EMS provider authorized by a written agreement with the SJCEMSA to perform specified EMT optional skills.

H. “NA” means not authorized.

I. “NR” means not required.

J. “NT” means a non-transport EMS response vehicle.

K. “Par Level” means the minimum quantity of an item stocked at the beginning of a shift, which will be automatically replenished, should the level fall below the preset level.

L. “SJCEMSA” or “EMS Agency” means the San Joaquin County Emergency
POLICY:

I. EMS Providers are required to develop a vehicle inspection procedure to ensure compliance with this policy at the start of each shift. A written record for each daily inspection of each EMS vehicle shall be maintained by the EMS Provider in an auditable format for a minimum of six months. EMS Providers shall require each attending paramedic, EMT, or CCT Nurse to conduct an inspection of their assigned EMS vehicle unit at the beginning of their shift.

II. The attending paramedic, EMT, or CCT nurse on each EMS vehicle is responsible for ensuring that all medications and equipment are present at the beginning of each shift, that all equipment is functioning properly, and that all battery-powered devices are charged.

III. Expiration dates for medications and supplies must be current, as applicable. All medications, supplies, and equipment shall be stored in accordance with the manufacturer’s recommendation unless otherwise specified in this policy.

IV. The quantities specified are minimum quantities.

V. EMS Policy No. 4102 ALS Medication and Equipment Inventory is revoked.
