Free Class Course Descriptions

**Auto Industry Haz Waste Mgmt:** Training covers waste identification and management procedures for hazardous waste typically generated in the Automotive Repair Industry.

**Basic Ag Environmental Management:** Training provides an introduction to environmental regulations that affect the Agricultural Industry, including Hazardous Materials Business Plans, storage of petroleum products, and hazardous waste management.

**DOT & Hazardous Waste Manifest:** This training is for companies that ship hazardous waste regulated by the Department of Transportation. Training covers identification of the DOT hazard classes and divisions, use of the DOT Haz Mat table, selection of proper shipping name, proper packaging, marking, labeling and placarding for DOT regulated waste shipments and the proper completion, distribution and retention of the Uniform Hazardous Waste Manifest for waste shipments.

**Hazardous Materials Business Plan/CERS:** This program covers completion, submittal and employee training requirements for facilities that are required to prepare a Hazardous Materials Business Plan because they store hazardous materials at their facility. Program will include navigating and using the California Environmental Reporting System (CERS).

**Hazardous Waste Management - Basic:** This training provides a general understanding of the basics of hazardous waste management. Training covers waste identification, container and tank management requirements for Large, Small and Conditionally Exempt Small Quantity Generators, basic hazardous waste shipping requirements, and an introduction to tiered permitting.

**Hazardous Waste Management - Advanced:** This training expands on the Basic training. In addition to topics covered in the Basic training this class also covers recordkeeping requirements related to hazardous waste, in depth waste identification and classification, land disposal restrictions and in depth tiered permitting requirements for waste treatment. Attendance of the Hazardous Waste Management – Basic class is prerequisite to attend this class.

**SPCC Plans for APSA Sites:** This course highlights the state regulations for facilities that store >1,320 gallons of petroleum products (fuels, oils, solvents, etc.) in aboveground tanks. Training covers regulated facilities and materials, Spill Prevention Control and Countermeasure Plans, recordkeeping, and training requirements.

**Universal Waste Mgmt:** Training covers identification of Universal Waste, spill response, proper storage, labeling, shipping, recycling and recordkeeping requirements.

**UST Owner/Operator:** This program covers the responsibilities for facilities that operate Underground Storage Tanks (USTs), and covers inspections, recordkeeping and training.
